

## Windshield Replacement Provider Unity Auto Glass Expands Service Area to Southwest Houston Texas

October 31, 2022

October 31, 2022 - PRESSADVANTAGE -

Unity Auto Glass of Sugar Land, a leading auto glass replacement company based in Sugar Land, TX, has recently expanded its service area to include Southwest Houston. Southwest Houston is a region in Houston that is from Texas State Highway 6, with the West Park Tollway in the north and U.S. Route 90 in the south. Meanwhile, the company's technicians always make sure to apply the most advanced windshield replacement techniques and the best materials. And their expansion means more car owners will be able to take advantage of the windshield replacement services.

Ty Turner from Unity Auto Glass says, "We're happy to be able to expand our services to include Southwest Houston as this means more people we can serve. Our technicians are trained to use the most up-to-date replacement methods and the best materials. For the best in windshield replacement service, new or used glass, and value, you can rely on us to get the job done right the first time. You'll save both time and money if our knowledgeable sales staff recommends the best new and used products for your vehicle."

Their expertise is evidenced by the many highly positive reviews they have been receiving from customers. For instance, Sarah Schuster said, "I gave them my highest recommendation! Tree limb smashed my windshield at work. Ty couldn't have been nicer on the phone to get it set up. Lee the installer arrived and the whole professional process just took 45 minutes, and the cost was fair. Customer service was outstanding, and the work itself was excellent." And Paul C. said, "While at work, someone smashed my back window. I called three different companies in a panic, hoping that one of them could fix the problem before I left the next day for a business trip. This company was great on the phone, promised same day service. Lee came to my Southwest Houston office and fixed the window in about half an hour. Service was fast and pleasant."

They want to emphasize that a windshield problem makes the car less safe to drive and accidents will not just affect the driver but also other people. It is less safe because a defective windshield affects the driver's vision and this is critical, especially when driving at high speeds. They also want to point out that an intact windshield contributes to the integrity of the vehicle during a collision. An intact windshield can contribute to limiting the damage to the car, especially its interior. With the Unity Auto Glass windshield replacements service, car owners can rest assured that their windshield requirements will be attended to in a fast, convenient, and hassle-free manner.

Ty Turner says, "If you're driving around and notice a chip or crack in your windshield, getting it fixed as soon as possible is important. A small crack can turn into a big problem if left untreated, so you'll want to have the windshield replaced as soon as possible. In addition to maintaining a driver's line of vision, a car's windshield also contributes to the vehicle's structural integrity. It is a vital component of the vehicle, and repairing a damaged windshield can cost between \$200 and \$1,500, depending on the car's make, model, and year."

For those who are unsure if the crack in their windshield is dangerous or not, they can have it checked immediately by a qualified mechanic. It is important to note that cracks that are less than 3/4 inch wide are still legal to drive but any crack that is bigger than that can result into a traffic ticket. Those who are worried about driving with a cracked windshield may also want to contact their insurance company and inquire about a supplemental policy.

Those who are interested in finding a reliable windshield replacements provider in Southwest Houston and nearby areas can check out the Unity Auto Glass of Sugar Land website or contact them on the phone or through email. They are open from 8:00 am to 5:00 pm, from Monday to Friday.
