What Dysport Is & How It Works - Center for Aesthetics Idaho Falls

October 26, 2022

October 26, 2022 -
The Center for Aesthetics Idaho Falls, based in Idaho, is reaching out to their community to explain what Dysport is and how it works. Center for Aesthetics uses state-of-the-art technology to provide a wide range of non-surgical aesthetic treatment options tailored to their patients? personal needs and preferences.

As CFA explains, Dysport is an FDA-approved prescription injectable for temporary improvement of the appearance of moderate to severe frown lines (glabellar lines) between the eyebrows in adults less than 65 years of age. As frown lines are not caused by aging alone but by constant, repetitive movements and muscle contractions, they can appear in younger adults as well. Left untreated, these frown lines can cause an unflattering angry, or sad look. Dysport uses a safe, purified derivation of botulinum toxin type A to relax the muscles. It can also be used to treat crow's feet, forehead wrinkles, and bunny lines. Those who want more information visit the med spa?s website. See more here: What is Dysport & How it Works.

The treatment works by blocking nerve impulses from reaching the muscles that are under stress. When

these impulses are stopped, the expressions of the muscles are minimized, gradually relaxing them and eventually smoothing out the appearance of wrinkles and fine lines on the forehead, around the mouth, or anywhere else on the face. Dysport is delivered via injection at the site that needs treatment (by means of a tiny injection pen).

Much like any other cosmetic procedure, The Center for Aesthetics recommends people interested in getting the Dysport treatment seek out a professional who has experience in administering it ? along with knowledge of facial anatomy ? to obtain realistic-looking results. The Center for Aesthetics Idaho Falls has more than 20 years of experience in performing non-surgical aesthetic treatments and injections. Unlike many other med spas that provide Dysport, CFA employs a team of experienced, board-certified Physician Assistants and Medical Doctors who are well-equipped to administer Dysport.

The aesthetics clinic goes on to explain that Dysport is fast-acting, though the exact results vary between users. More than half of users see improvement in moderate to severe frown lines between the brows within 3-7 days, though it may take a little longer for others. Dysport will last for about three or four months after the treatment ends. Those who have previously stopped using Dysport and start again can see its effectiveness in about a month. The Center for Aesthetics does point out that Dysport is a temporary solution and will diminish over time if patients do not keep up with the treatment. Those who want to maintain the results should set up a follow-up schedule with their doctors. This will keep the wrinkles at bay, prevent new lines from forming and keep their skin looking youthful.

In addition to providing Dysport, The Center for Aesthetics also offers other non-surgical treatments such as laser hair removal, CoolSculpting, Botox, RHA Dermal Fillers, Hydrafacials, Clear + Brilliant, Microneedling, PRP platelet-rich plasma therapy, laser treatments and other de-aging protocols ? such as the CFA Evernal Series, created by Dr. Durboraw.

The services offered by The Center for Aesthetics Idaho Falls have earned the clinic great praise from its patients. Debra writes in her 5-Star review, ?I had an amazing and relaxing time at CFA. They did a fantastic job. Very knowledgeable and detailed about every step of the procedure and answered a lot of my questions regarding my skin and what products to use. I would highly recommend them. The whole experience, from the moment I walked in and the moment I left, was amazing. I look forward to my next one!?

Shannon, who has been a patient since 2013, writes in her review, ?Exceptional customer service by a highly qualified and caring team. The staff at CFA truly values their patients' happiness and satisfaction above anything else. Dr. Durboraw went above and beyond to provide me with treatment that far exceeded my expectations. After seeing two doctors before her, it was Dr. Durboraw who had the knowledge and technology. I will forever be grateful to her and cannot speak highly enough about the Center For Aesthetics facility.?

Those who want to learn more about the full range of treatments offered by The Center for Aesthetics Idaho Falls should visit the company?s website for more information. Dr. Catherine Durboraw, MD, encourages interested parties to get in touch with her or one of the clinic?s representatives via email or phone. The Center for Aesthetics also maintains a presence on Facebook and Instagram.
