

Off-Island Dental Care Highlights Significance of Teeth Cleaning for Sound Oral Health

October 26, 2022

October 26, 2022 -
Bluffton, SC - Off-Island Dental Care, a well-respected family dentist in South Carolina, highlighted the importance of regular Teeth Cleaning. Apart from hygiene, it plays a bigger role in maintaining overall oral health, the Bluffton-based dental company emphasized.

Teeth cleaning is the first step to ensuring gum and teeth health. Through teeth cleaning, plaque and tartar build-up leading to oral health problems like tooth decay are addressed. Furthermore, dental professionals can detect some health problems through teeth and gum conditions.

Offering general dentistry, Off-Island Dental Care also provides the most comprehensive teeth cleaning service. Patients of Off-Island Dental Care can benefit from their cutting-edge technology, welcoming setting, and compassionate team willing to assist anytime.

Dental professionals always begin their teeth cleaning services with a complete dental examination to

determine the current condition of the mouth. The dentist thoroughly inspects the patient's teeth and gums for signs of tooth decay, gum disease, and other health problems.

Once the examination is done, appropriate dental treatment is suggested to the patient. If no other issues are spotted, the dentist continues with the teeth cleaning process. It starts with the removal of plaque and tartar. They then perform an excellent method of deep cleaning and polishing the teeth. They also do professional flossing to ensure that no plaque remains. After rinsing, they also treat the teeth with fluoride to prevent cavities for several months.

With their years of experience, the Bluffton SC Dental Clinic has provided the Bluffton community with reliable services. Besides teeth cleaning, Off-Island Dental Care also performs other general dentistry procedures. They cater to Dental Fillings, Composite Fillings, TMJ Therapy, and Teeth Whitening services. The Bluffton company also offers cosmetic dentistry services such as microabrasion, veneers, and removable clear braces. In addition, they also perform Specialized Dentistry, including Dental Implants, Dental Crowns, Dental Bridges, Root Canal Therapy, Oral Surgery, Oral Hygiene, and Gum Disease Therapy.

"We offer a personalized approach for each patient, assisting you in developing the ideal treatment strategy based on your objectives and interests. We can help whether you need a checkup and cleaning or are looking for cosmetic procedures to make your smile look better."
