

Cost Of Vasectomy Reversal Lowest At Texas Clinic

November 14, 2022

New Braunfels, TX - November 14, 2022 -
The New Braunfels, TX based clinic Microsurgical Vasectomy Reversals by Dr. Mark Hickman has taken steps to minimize the cost of a vasectomy reversal. The clinic offers two all-in-one packages that limit both a patient?s costs and stress, and they urge anyone looking to expand their family to get in touch today to learn more.

Apart from the low cost, one of the greatest advantages of the options available at Microsurgical Vasectomy Reversals is the fact that patients have virtually no complications to be concerned about. Each option, at $3,300 and $4,200, is all-inclusive, which means Dr. Hickman will continue the procedure and make every attempt to successfully reverse the vasectomy in question no matter what additional issues may be discovered during the procedure. Crucially, patients will also find that the cost remains fixed even if a procedure requires more work than expected.

The $3,300 option includes local anesthesia and an oral sedative. The $4,200 option, meanwhile, is performed under IV sedation and is administered by a Board Certified Anesthesiologist. Neither has any hidden fees whatsoever, and patients are welcome to contact the clinic?s office today for a free consultation.

As the clinic and its patients are aware, there are many reasons why a man would want to reverse a vasectomy. While many believe a vasectomy is a permanent procedure, the truth is that it can be reliably reversed, and this option is often pursued primarily because the individual in question is not ready to give up his ability to father children. Those who originally seek a vasectomy may do so with good reason, but these reasons can often change over the course of a lifetime. At some point, a man may come to regret this decision, and this is where he may turn to Dr. Mark Hichman for help. An accomplished surgeon, Dr. Hickman and the team at Microsurgical Vasectomy Reversals have dedicated themselves to helping men get back on the path to fatherhood (or give their children more siblings).

The clinic has worked with countless patients since first opening its doors, and this means they have directly contributed to the expansion of families all over the country. The clinic regularly receives correspondence from grateful parents who attribute a large part of their ability to have a child again to Dr. Hickman?s invaluable work. While many of these letters, calls and emails are private, some have also taken to posting publicly about the clinic, and Microsurgical Vasectomy Reversals proudly invites all interested parties to take a look if they are curious how patients tend to fare once they undergo a reversal.

?Doctor Hickman performed my husband's vasectomy reversal in March of 2020,? says Sheilah B. in her glowing review, ?10 years after his vasectomy, and we conceived a few months later. My daughter arrived a little early, but our original due date was exactly one year after surgery. Dr. Hickman and his staff were all very knowledgeable and friendly, and the procedure itself was very affordable. We're obviously thrilled with the outcome!?

Adam C. says in another review, ?Dr. Hickman and staff are absolutely amazing in every way. We had a reversal done in January of 2021, and our daughter was born March 10th 2022. Dr. Hickman was very thorough and set real expectations from the beginning, you feel the love he has for what he does and the love his staff has for what they do. I highly recommend using Dr Hickman. We flew from VA to see him, he will forever be a huge part of our life. Thank you, Dr. Hickman and staff.?

A free consultation can be scheduled by calling or emailing the clinic?s office. Notably, patients who are traveling great distances to see Dr. Hickman are advised to inform the clinic if they need accommodations. Microsurgical Vasectomy Reversals has a professional relationship with several local businesses, and the staff may be able to help patients secure special rates around the date of their procedure.

Anyone who finds themselves regretting their vasectomy should take hope. An affordable vasectomy reversal is often no more than a phone call away.
