

Chiropractor Near Me in Beaverton Earns Another Five Star Review

December 03, 2022

Beaverton, Oregon - December 03, 2022 -

True Potential Chiropractic, a chiropractic and massage therapy clinic in Beaverton, OR, is proud to announce that they have earned another five star review from a satisfied patient. The clinic offers the services of an auto injury chiropractor Beaverton residents can depend on. The latest five star review that they have received came from a patient who, along with her daughter, suffered from a vehicular accident. After the accident, her daughter felt something wrong with her ear and started pulling on it. Her pediatrician recommended an antibiotic, believing it was an ear infection, but weeks later, her daughter continued to pull on her ear. It was Dr. Bryen Bell, founder of True Potential Chiropractic, who revealed to her that a misalignment in children can manifest as ear pressure.

In the five star review that was given by Aly L., she said, "Very thankful for Dr. Bell, Dr. Mennel and their team! My daughter and I were in a rear end vehicle accident awhile back and they not only have been a crucial part of my recovery but we're able to solve a surprise issue for my daughter. After the accident my daughter started pulling on her ear, I took her to her pediatrician thinking she had an ear infection, well she didn't but we did a round of antibiotics just to be sure, several weeks later she was still pulling in her ear. After a conversation about her with Dr. Bell he shared with me that misalignment in children can show in the form of ear pressure. Less than a month of treatment from the TPC team and my daughter has completely stopped pulling on her ear and any signs of discomfort are gone. I'm extremely thankful they were able to solve this for us. Long story short, I highly recommend having your children checked out by the TPC team after an accident. They are kind, welcoming and do a great job of making you feel comfortable. I will definitely be taking my other children to see them when needed. Thank you."

True Potential Chiropractic does not only provide services for people involved in a car accident but they can also help athletes, especially when they suffer an injury. One of the techniques they can help with is assisted stretching. Beaverton athletes need to boost circulation and strength, minimize pain, improve recovery time and posture, and alleviate tight muscles. Assisted one-on-one stretching is targeted towards certain muscles

and connective tissues. Their stretchologists combine post-isometric relaxation (PIR) with traction and oscillation in order to realign, lengthen, and reorganize connective tissues known as fascia. They are able to enhance flexibility even during the first session, although results may vary and the process is designed to enhance the body's performance at the gym, on the field, or on the job.

Started in 2013, True Potential Chiropractic is focused on lifestyle care, especially for members of the family. This chiropractic clinic has evolved into one of the best providers of family corrective care in Beaverton and surrounding areas in the Pacific Northwest. Dr. Bryen Bell, who established the clinic, is committed to offering non-drug solutions as the main alternative in health care. In the pursuit of this goal, Dr. Bell has established a fully computerized and advanced corrective care family wellness center in Beaverton, Oregon, shortly after he moved to the Pacific Northwest in 2013. This is a sports rehab and family chiropractic practice that helps people achieve better wellness and health via maintenance and prevention, instead of providing a cure after a health problem has already occurred, such as disability, pain, and disease. Dr. Bell's wellness philosophy is founded on the six laws of the human body, which are: alignment, diet, exercise, mindset, rest, and stress management.

When requiring the services of an auto injury or sports chiropractor Beaverton residents can visit the True Potential Chiropractic website or contact them on the phone or by email. They are open from 9:00 am to 6:00 pm on Tuesdays, Wednesdays, and Thursdays; and from 9:00 am to 11:30 am on Saturdays.
