

Brinton Vision Released New Information on the Affordability of LASIK

November 30, 2022

ST. LOUIS, MO - November 30, 2022 - PRESSADVANTAGE -

Brinton Vision, the leading vision correction center in the St. Louis area, recently published an article about the affordability of LASIK eye surgery. The article compares the cost of glasses or contact lenses over a person's lifetime to the one-time cost of the LASIK procedure. In addition, it shows prospective LASIK patients the savings they could realize by undergoing the procedure and eliminating the need for contacts or glasses.

In the article, Brinton Vision tells readers what makes their eye care facility different from the rest and explains the advanced diagnostic services they offer their patients. They also note how their procedures are priced honestly and with integrity and do not change. They offer a "what you see is what you get" approach to their pricing.

Brinton Vision offers financing for all of its vision correction procedures, including LASIK. Their most popular financing options are zero down payment with no interest for 24 months or zero down payment with low monthly payments and a fixed interest rate for 60 months. They accept cash, check, credit card, or other financed payment options.

The article also explains in detail what goes into the cost of LASIK. The cost of LASIK includes not only the doctor's fee for the surgery but also the usage of new technology, post-operative care, and patient satisfaction guarantees. Brinton Vision answers other common questions about if insurance will pay for LASIK if patients can use Medical Savings accounts to pay for LASIK, and if the procedure is tax deductible.

Brinton Vision's state-of-the-art laser eye surgery center is situated in Creve Coeur, Missouri, not far from St. Louis. It is the only full-time refractive surgery center in Missouri that does LASIK and its six contemporary variations, including SBK, SMILE, Visian ICL, KAMRA Inlay, CLR (Custom Lens Replacement), and PRK. For more information about vision correction, contact Brinton Vision at (314) 375-2020 or visit BrintonVision.com.
