

Electronic Merchant Systems Offers Dance Studio Payment Processing Solutions

December 06, 2022

Cleveland, Ohio - December 06, 2022 - PRESSADVANTAGE -

Electronic Merchant Systems (EMS), a company based in Cleveland, OH, is pleased to announce that they are offering dance studio payment processing solutions. Dance studios offer a welcoming and supportive environment for people of all ages and skill levels, allowing them to hone their talents, develop more self-confidence, and enjoy themselves in the process. And streamlining their payment processing is one of the simplest ways to ensure a great experience for everyone who dances in the studio. EMS works closely with small businesses, such as dance studios, to ensure they have long-term payment solutions that contribute to their success.

A spokesperson for EMS says, "EMS has your dance studio covered, from top POS systems and mobile payment processing solutions to completely customized gift cards. If you want top-notch dance studio payment processing, set up a consultation. Want more information? Check out our website to see why EMS is the best merchant services company for your dance studio."

EMS offers one of the leading POS terminals for dance studios, which is the MaxxPay Mini. This is an all-in-one payment solution that provides the advantage of having a small footprint, thus making it suitable even for small dance studios. It will occupy minimal counter space while still providing all of the requisite POS features. The benefits offered by the MaxxPay Mini include: high functionality; fast payments; cloud-based back office; and easy to use interface.

The hardware features of the MaxxPay Mini are: a 5-inch touch screen with white LED backlight; 0.3-megapixel fixed front camera with 5-megapixel autozoom; card reader capable of accepting chip cards, swipe cards, and mobile wallets; rear camera for reading 1D and 2D bar codes; and a long-lasting lithium-ion battery. It is provided with a fast thermal printer that is hidden below the touch screen in order to maximize screen usage. And it offers communication support for Wi-Fi, 4G, and Bluetooth.

For those who want a bigger POS terminal, EMS offers the MaxxPay Pro. It has an Android OS and is also cloud-based. It has an 8" touch screen, an integrated card reader, a 4.3" color touch screen display, a 3" high speed printer, an integrated camera for 1D or 2D bar code scanning; and a standalone four-bill, four-coin cash drawer. It has several helpful features. Its inventory management feature includes item alerts, physical counts, quantity tracking, and more. It also allows for price discounts, tax reporting, and customer payment options, such as split payments, adjustment of tips, complete partial refunds, and more.

EMS can also optimize the dance studio's payment processing and merchant services. They have more than 30 years of experience and can offer unmatched merchant services designed to help the dance studio succeed. Furthermore, EMS has been a certified level 1 PCI provider for more than 10 years, which ensures security. They also provide 24/7/365 support, ensuring clients that there is always someone ready to answer their questions and address their issues.

EMS can also handle all of the dance studio's merchant services needs, such as: improving cash flow; offering the best payment processing tools and opportunities; providing the best possible credit card rates; gift and loyalty programs; and streamlining of business operations.

Launched in 1988, Electronic Merchant Systems has evolved into a leading national payment processor and merchant services company with over 30 years of experience in the payment processing industry. With their services, they can help local businesses boost their sales by enabling them to accept card payments, including all credit cards, major debit cards, electronic bank transfers, electronic check services, and stored-value cards. They have been helping tens of thousands of start-up, retail, and Internet businesses in various places in the country. Around 95 percent of EMS customers have already taken advantage of the huge savings from a rate review. EMS has 11 regional sales offices in various cities in the United States, and over 100 cities have an EMS presence.

Businesses interested in knowing more about credit card processing services can check out the EMS website or contact them by phone or email.
