

EPS Landscaping & Tree Service Provides Commercial Landscaping in the Southwestern Ranches and More

December 06, 2022

Pembroke Pines, Florida - December 06, 2022 -
EPS Landscaping & Tree Service LLC, a company located in Pembroke Pines, FL, has announced that they are offering commercial landscaping services and more in the Southwest Ranches and the whole of Broward County. Commercial landscaping offers several advantages for a business. A key benefit is that a well-maintained landscape is attractive and stimulates employee productivity while attracting new clients. It also indicates to the customers and potential customers that the company has deep ecological values, especially if sustainable hardscape materials, native and location-appropriate plants, and water gardens are used.

Greg O'Connell, co-owner of EPS Landscaping & Tree Service LLC, says, ?We offer a vast array of landscaping services available to local customers in Pembroke Pines and the greater Broward County FL area. Many offer customized solutions and bilingual specialists, while some are family-owned, making residents feel comfortable and valued. Local homeowners and businesses have a great selection of landscaping companies to choose from when they search ?landscaping near me?, provided that they understand the fine details of working with these services.?

Their commercial landscaping services include: landscape installation; pool landscaping; hardscaping; landscape maintenance; and tropical landscaping. Business owners enjoy different benefits with the aid of the EPS professional landscapers they provide. One important benefit is customized landscape design because they will base the design on the client?s idea of the overall appearance of the landscape. The second benefit is the color scheme for the landscaping that will be developed by their team of designers in close consultation with the client in choosing the specific colors and types of plants and flowers that will be included in the landscape design. Third, they are keen on making sure that the landscape design will employ innovative ideas to have a highly functional outdoor space that is both attractive and fashionable. Fourth, they will make sure that the landscape services are provided at a reasonable price. And lastly, their more than 20 years of experience can ensure that the commercial landscape will truly be effective.

They can also provide tropical landscaping design, which is suitable for Florida?s humid subtropical climate. This kind of landscape will depend heavily on tropical plants. Tropical landscaping may be more challenging to map out when compared to other types of landscaping because it requires the use of various kinds of plants that need varying approaches to care. For instance, it will require taking into account sunlight and the distance between plant pots. Tropical landscaping will typically include: large and vibrant leaves; lava rock; water features such as a small waterfall or a pool; and island decor like tiki torches and hanging lights.

Another popular kind of landscaping in Florida is pool landscaping because backyard swimming pools are quite common in this area. Tropical landscaping and pool landscaping usually complement each other. Tropical plants are often used to make the pool area more attractive plus they offer the benefit of being low-maintenance. They suggest that people choose landscaping features that are typically low-maintenance and are safe for both children and pets, and will not be a tripping hazard for people near the pool.

EPS Landscaping & Tree Service has been a provider of landscaping, tree care, and lawn care services in the Broward County area for over 20 years. They are keen on offering their services at affordable prices while ensuring that they always deliver the best quality services. Their services are made available in Broward County, including Southwest Ranches, Coral Springs, Hallandale Beach, Hollywood, Deerfield Beach, Dania Beach, Fort Lauderdale, Pompano Beach, and Pembroke Pines. And they are committed to providing affordable estimates for homes and businesses.
