Electronic Merchant Systems Enables Floral Shop Credit Card Processing

December 12, 2022

Cleveland, Ohio - December 12, 2022 -
Electronic Merchant Systems (EMS), a company based in Cleveland, OH, is happy to announce that they are offering floral shop payment processing solutions. Florists typically are busy people because they need to select from a variety of flowers, greens, plants, and other floral items and then make the floral arrangements for specific events and occasions. One way to make things easier for the florist to run the floral shop is to streamline and simplify the buying process for customers, and this may be done by using an advanced POS system, such as one of those available through EMS.

A representative for EMS says, ?We work closely with businesses like your floral shop to provide payment solutions that promote success. Our top-notch credit card processing services allow us to do this. We provide outstanding point-of-sale systems, mobile payment processing solutions, and fully personalized gift cards for your floral business. With over 1,000 Google customer reviews, it's clear that we have successfully helped many businesses grow. Turn your floral shop store into a place for locals to celebrate a special occasion or just everyday life. If you want the best floral shop payment processing check us out to understand why EMS is the perfect merchant services provider for your business.?

They offer a range of MaxxPay POS systems, but for floral shops, they would like to recommend the MaxxPay Mini. The MaxxPay Mini serves as an all-in-one payment solution that has the advantage of having a small footprint, thus making it suitable for relatively small shops where the space is usually filled with flowers and merchandise. The MaxxPay Mini has been designed to take up minimal counter space while still providing the necessary POS features. The benefits provided by the MaxxPay Mini include fast payments; easy to use interface; cloud-based back office; and high functionality. The quick payment processing will naturally be appreciated by customers who no longer have to wait in line for a long time since payment is easily done by swiping the card. It also allows the florist to accept all kinds of major credit cards as payment, including the swipe, chip, and contactless options.

For larger floral shops that prefer a more advanced POS system, also available are the MaxxPay Pro and MaxxPay Premier. The MaxxPay Premier is a robust cloud-based solution but has a more affordable price compared to other systems. Its Android OS can also be paired with modern computing devices. It is equipped with a 15.6? LED touch screen that can also be used as an electronic signature terminal when flipped; a 2 x 16 character display; a 3? high-speed printer; a built-in five-bill, six-coin cash drawer; an integrated card reader for swiping various cards and mobile wallets; and a 1D and 2D bar code scanner. It can also be used for pricing discounts, processing various customer payment options, and inventory management. Meanwhile, the MaxxPay Pro has a more compact package but still offers quality performance. It also has an Android OS and is also cloud-based. It has an 8? touch screen; an integrated card reader; a 4.3? color touch screen display; a 3? high-speed printer; an integrated camera for 1D or 2D bar code scanning; and a standalone four-bill, four-coin cash drawer.

Initiated in 1988, Electronic Merchant Systems has gradually earned the reputation of being a top national payment processor and merchant services company with more than 30 years of experience in the payment processing industry. With their services, they are able to help local businesses increase their sales by allowing them to accept card payments, such as major debit cards, electronic bank transfers, all credit cards, stored-value cards, and electronic check services. They have provided their help to tens of thousands of retail, Internet, and start-up businesses in different locations in the US. Approximately 95 percent of EMS customers have already benefited from the large savings from a rate review. EMS has 11 regional sales offices in different cities in the country, and more than 100 cities have an EMS presence.

Those who are interested in learning more about the floral shop merchant services can visit the EMS website or contact them on the telephone or through email.
