

Mobidonia Launches Brand New Shopify Module

November 29, 2015

November 29, 2015 - PRESSADVANTAGE -

Mobidonia has announced that they have launched their new Shopify module. Through the module, people who have a Shopify store can seamlessly turn it into a mobile app, enabling customers to shop on the go. This app for smartphones and other mobile devices has been designed to be easy to use and is already proving to be very popular.

"The new Shopify mShop by Mobidonia has several useful features," says a representative from the company. "It can be set up in just a few clicks and you're good to go. As such, it helps to integrate everything that consumers look for right now: the ability to shop online, and the ability to do so from any device and from anywhere."

Mobidonia.com is a popular online business that helps people create powerful mobile apps. They are able to do so in less than a day, adding any features that someone would need. They also pride themselves on the affordability of their work. All their apps are placed on a cloud based platform, which means they are always protected and accessible.

The new Shopify mShop has been created for those who already have a Mobidonia app, as it integrates quickly and easily. Those who don't have such an app will also be able to use it, although it will take a few more configuration steps. Overall, it takes just a few minutes to set the shop up for it to be fully functional on mobile devices.

"According to mobile analytics firm Flurry, shopping app usage grew faster than any other category of apps. Mobile commerce is on track to grow 300% faster than traditional eCommerce by 2016. Now you have more reasons to make a mobile shop app," says a company representative.

People are also encouraged to give the company a 'Like' on Facebook. This gives them the opportunity to join the community of other users and to ask any questions they may have. Additionally, it is an opportunity to be kept up to date with latest developments in the world of mobile app development and online stores.
