

Parma Podiatrist Ripepi Foot and Ankle Clinics Now Offers Microwave Wart Treatment for Plantar Warts

January 06, 2023

January 06, 2023 - PRESSADVANTAGE -

Parma, Ohio, residents looking for relief from plantar warts can now turn to Ripepi Foot and Ankle Clinics, Inc. The clinic has announced that it will now offer plantar wart treatments using the brand new Saorsa Swift Microwave Therapy system, a modern solution to the skin condition that is being hailed as revolutionary by podiatrists all over the country. Further details about the Parma podiatrist can be found at: <https://www.stopfootpaintoday.com/>.

The Saorsa Swift system is a surface-based device intended for the coagulation of soft tissue during non-invasive procedures. It uses microwave radiation to rapidly increase the temperature of the affected tissue and target the root cause of the skin condition. Since the microwaves don't break the surface of the skin, the patient does not need to wear any post-procedural padding after treatment. The procedures are also much shorter, and the patient does not need to rely on anesthesia during them.

Since microwave radiation has been extensively used in medical equipment for decades, it can be very precisely controlled, which is exactly what the Saorsa Swift system does to great effect. The microwaves travel to a predetermined depth and work within their limited defined field, going no deeper than how much

they are programmed to. This unique property of microwaves and the way that the Saorsa Swift system harnesses their power are the reasons why the treatment is much safer and cleaner than the traditional methods of treating plantar warts including cryotherapy, salicylic acid, and laser ablation.

Dr. Ripepi, the founder of Ripepi Foot and Ankle Clinics, Inc., talks about the benefits that the Saorsa Swift system will bring to his patients by saying, "This is nothing short of a game changer. Cryotherapy and salicylic acid have the side effect of damaging excess surrounding tissue along with plantar warts. Similarly, laser ablation and electrocautery devices produce a plume that can be hazardous to everyone in the clinic. With the introduction of the Saorsa Swift system, we can ensure that treating plantar warts is safer, cleaner, and faster. Moreover, Saorsa's research shows that using the Swift device has shown no evidence of scarring and patients also report low post-procedural pain if any. If you are suffering from plantar warts, get in touch with us today to book an appointment. You will be delighted at just how simple the Saorsa Swift system makes treating your skin condition. Follow us on Facebook at <https://www.facebook.com/RipepiFootAnkle/> to stay updated with more such exciting news and developments."

Dr. Ripepi, a native of the Cleveland area, attended St. Ignatius High School, John Carroll University, and the Ohio College of Podiatric Medicine. He then completed his residency training in foot and ankle surgery in St. Louis, Missouri, and has spent over 20 years in solo practice. Dr. Ripepi is also Board Certified by the American Board of Podiatric Surgery and is a member of the American College of Foot & Ankle Surgeons. He is on staff at Fairview Hospital, UH Parma Medical Center, and Southwest Hospital. His professional memberships include the ABPS (American Board of Podiatric Surgery), the AAPSM (American Academy of Podiatric Sports Medicine), and the ACFAS (American College of Foot & Ankle Surgeons).

Ripepi Foot and Ankle Clinics, Inc. provides comprehensive foot and ankle treatments to address all kinds of foot problems including dull or nagging pain, bunions, children's feet issues, plantar warts, plantar fasciitis, Achilles tendinitis, Sever's disease, traumatic injuries, diabetic complications, sports injuries, skin, and nail conditions, and much more.

One of the testimonials highlighted on the clinic's website says, "Dr. Ripepi was able to treat and cure my plantar fasciitis without the use of injections. The treatment was painless, and it worked quickly. I can now walk pain-free. The laser treatments for my toenails are also working. The staff is wonderful! They are professional and friendly. They make it easy to make or change appointments. They are very accommodating. I have recommended several friends to see Dr. Ripepi."

The Parma office of Ripepi Foot and Ankle Clinics, Inc. can be contacted at (440) 843-3692 to schedule an appointment. The clinic also has another location in Rocky River. The clinic is encouraging Parma and Rocky

River residents to follow the clinic's Twitter page at https://mobile.twitter.com/dr_ripepi to stay updated with its announcements.
