

Prescott Landscaping Completes Huge Garden Makeover In Arizona

November 27, 2015

November 27, 2015 - PRESSADVANTAGE -

Concepts to Reality Landscaping, a landscaping business in Prescott, AZ, has completed a garden makeover for a family in Arizona. The company was recently in the news for experiencing record growth. They realized that people in Arizona were starting to understand that the arid landscape of the state does not mean there are no possibilities for the creation of beautiful gardens. As a result of that news piece, the company was contacted by a family who had a huge garden that was completely dilapidated. The company is proud to announce that after a month of hard work, they have completed what can only be described as a work of art.

"The Peterson family had never done anything with their garden," says Mike Biegel from Concepts to Reality Landscaping. "It was overrun with dry weeds and the ground was dry and barren. But we were able to turn this into an oasis of calm, with beautiful trees, plants and shrubs and even a water feature. We must thank the Peterson family for this opportunity, but also our new members of staff who worked so hard to complete this to satisfaction."

The landscaping company looked at the available land, which was mainly rectangular in shape, and got to work on transforming it from top to bottom. They added various plants that are particularly suitable to the Arizona climate, built irrigation systems and constructed planters and seating areas, using locally sourced materials. The result was a true and complete transformation.

"Our garden went from a piece of land to something we can enjoy and even show off," says Mr. Peterson. "Now, our kids can play and learn about plants, and we can enjoy the great outdoors. We really can't thank Concepts to Reality enough for their amazing work. We thought their vision was impossible to achieve but they have proven us completely wrong."

Further details about work completed by the Prescott AZ landscape design company is available through the company's website. They have also created a number of YouTube videos that show off their skills and the work they have completed, as well as provide other information about their line of work and the possibilities for Arizona gardens.
