

High-Quality Online Lunch Container Store

Happytiffin.com Introduces Two New ?Lunch Bowls? To Their Collection

November 23, 2015

November 23, 2015 - PRESSADVANTAGE -

Saint Louis based online store Happy Tiffin recently widened their Food Container collection by announcing the addition of two new air-tight, water-tight stainless steel food containers or as they called ?Lunch bowls.?

Talking about the new products, company officials said that these two new products, ?Lunch Bowls?, have been specifically made from the high quality food grade 18/10 stainless steel. This ensures that the quality of the food stored in the container doesn?t diminish. The containers can be used repeatedly over a longer period of time. Since the use of extremely superior quality material, the company has taken care that these and all other products of theirs be completely eco-friendly.

They added that these bowls have been designed in order to make them highly useful for the customers. While one is made with different small separable compartments to keep different food items stored separately, the other on is a five bowl set of nesting, stacking and latching type food container with three locking latches to ensure neatly stacked food items without having any fear of getting them spilled in bags and spoiling it.

The company officials told that their aim is to provide the best possible products for their customers. They have always been working to improve the range and qualities of their products, and this has made them one of the top choices for their customers and they are still working on the same principle.
