Oklahoma City Area Fence & Shelter Contractor Discusses the Benefits of Wood Fence Installation

January 03, 2023

January 03, 2023 -
Blanchard, Oklahoma-based Arrow Fence & Shelter has been providing quality fencing services to those in Central Oklahoma for almost 20 years now. In that time, they have become known for being a very responsive company that knows how to treat a customer the right way. This fence and shelter contractor also offers its customers a wide variety of fencing materials to choose from. That selection includes wood fencing which continues to be a popular fencing option for Arrow Fence & Shelter?s customers. That?s why the company wanted to discuss further the many benefits that installing wood fencing offers.

A company spokesperson says, ?With more and more synthetic fencing options entering the marketplace, you would think that wood fencing would start to lose some of its appeal. From what we have observed that?s simply not the case. Wood remains one of the most popular fencing options. That?s a direct result of the many benefits that wood fencing offers to those that choose to install it.?

The company spokesperson elaborated on this further by providing more details on why wood fencing remains popular to install. Some of that has to do with the fact it?s still one of the most cost-effective types of fencing to get put in. It is a much less expensive option than synthetic types of fencing. He also reminded that it?s a good-looking fencing material too. This is true whether it's left in its natural state and stained or is painted in just about any color that a customer wants it to be. According to the company spokesperson, wood is also one of the favorite types of fencing for their experienced crews to install. This has much to do with the versatility that wood fencing offers. It can be cut to make it fit better or to make it look more decorative and there is not much creative-wise that cannot be done with wood fencing material. It can also have its slats placed close together which makes wood fencing an excellent choice for privacy fence installation. He also stated that wood is very light which makes it easier to install and when it comes time to replace any pieces that have become worn or broken over time. Despite its lighter weight, wood is still one of the stronger fencing materials too. It also should not be overlooked that wood is a very environmentally friendly fencing choice because when it's disposed it will naturally decompose over a short time. This is one of the reasons

why some city codes and housing communities will not allow for the installation of any type of fencing except those made of wood. He stated that they are always ready to discuss wood fencing options with any of their customers that are thinking about installing it.

It was also mentioned by the company spokesperson that if a customer does not want a wood fence, they have many other decorative and functional residential and commercial fencing material options. This includes chain link, iron, ornamental iron, vinyl, dog, and aluminum fencing choices.

When a customer chooses Arrow Fence & Shelter to install fencing for them, they also get a company that carries with it a 5-star reputation for its products and services. Glowing reviews such as the following have become the norm for Arrow Fence & Shelter. Roger Blaukat proclaimed, ?I had 500? of privacy fence installed by them, and couldn?t be more pleased. This company is very professional, arrives on time, and does quality work. I would definitely recommend them to anyone needing a good fence at a fair price!? Dale Morgan stated, ?I called this company about some repairs to my fence. The owner called me back within 2 hours and the next day he was out here to look at what I wanted to do to my fence. He gave me a great quote and was out here on a Saturday morning to do the job. The crew was very nice and professional. I will use them again when we install more privacy or another type of fencing.?

More on Arrow Fence & Shelter?s wide variety of fencing services can be viewed on its website.
