

Dr. Mark Hickman Offers Affordable Price of a Vasectomy Reversal to Help Men Regain Their Ability to Become a Father

January 03, 2023

New Braunfels, TX - January 03, 2023 - PRESSADVANTAGE -

Dr. Mark Hickman, MD, FACS, a surgeon in New Braunfels, TX, has announced that the price of a vasectomy reversal he is offering has been made affordable as a way to encourage and help men who regret their decision of having a vasectomy. Dr. Hickman, who is microsurgery expert and has devoted his practice to vasectomy reversal, believes that altering man's physical body to prevent pregnancy is not the proper way to avoid having more children. He believes in the natural methods of family planning and will always try to discourage men who are considering getting a vasectomy by telling them the experiences of many men who have experienced the negative effects of the procedure, including anxiety and depression. For some reason, many men felt depressed for the loss of their ability to father children. But now with the vasectomy reversal procedure being offered by Dr. Hickman, which is minimally invasive, men can regain their ability to father children. In addition, he is offering the procedure at a low all-inclusive cost of \$3,300.

Dr. Hickman is an active participant in vasectomy reversal ministries where he discourages men who are planning to have a vasectomy. He strongly believes that artificially blocking the vas deferens to prevent the natural process of procreation goes against God's purpose for human fertility and sexuality. He would tell

stories about men who suffered depression and anxiety after vasectomy because they felt that they were no longer whole and they have even experienced a reduction in their libido. On the other hand, some men felt encouraged to have sexual relationships with other women because they no longer had to worry about getting another women pregnant. As part of his active involvement in discouraging vasectomy, Dr. Hickman is a member of the Apostolate Board for the North American Province of the Missionaries of the Holy Family and the Mens ACTS Retreat Ministry. And he wants to give vasectomized men the good news that it is possible to undo their previous decision with a vasectomy reversal procedure.

Dr. Hickman offers the vasectomy reversal procedure at two all-inclusive options. This ensures his patients that there will be no surprises when they pay the bill. The first one is \$3,300 for the procedure performed using local anesthesia and an oral sedative. The other option is \$4,200 with the procedure done with the patient under IV sedation that is administered by a board certified anesthesiologist. He is also encouraging men from other parts of Texas and even from other states to visit his practice in New Braunfels and get the procedure. As a way to make it easier for them to afford the vasectomy reversal, he has made special deals with the local hotels to allow his out-of-town patients to enjoy a 50 percent reduction in the cost of the or hotel accommodations.

Dr. Hickman says "With the affordability of the vasectomy reversal procedure that I am offering, out-of-town patients would find it viable to come to New Braunfels to have the procedure. And why not hit two birds with one stone? If you come to our town, you may also want to check out the various attractions that our tourist town has to offer. We have two of the most beautiful rivers in the country. And we have Schlitterbahn, which is the largest water park in the US. Also, the village of Gruene is very close to our vasectomy reversal center. It is a historic district in our town that has several restaurants and shops you can go to."

Dr. Hickman has 26+ years of experience and has become known as one of the leading minimally invasive surgeons in the country. Currently, he has already done more than 1,300 vasectomy reversals and he has also "corrected" several vasectomy reversals that were performed by other providers. And he truly believes in the necessity of what he is doing as a result of his religious beliefs and he is committed to always providing affordable all-inclusive vasectomy reversal choices. He believes that vasectomy reversal can also help with the mental health of vasectomized men, particularly those who felt they were only pressured by their partner into undergoing vasectomy.

Men who are interested in taking advantage of the affordable cost to reverse a vasectomy can check out the Microsurgical Vasectomy Reversals by Dr. Mark Hickman website or contact them on the telephone or

through email. They are open from 8:30 am to 5:00 pm, from Monday to Friday.
