

North Dallas Dermatologist Dr. Angie Koriakos Offers the Saorsa Swift Microwave Therapy for Warts

January 31, 2023

January 31, 2023 - PRESSADVANTAGE -

K Dermatology & Wellness Institute is now offering patients in the Dallas area suffering from warts the opportunity to heal using a new, clean, safe, and fast microwave-based therapy, the Saorsa Swift System. Readers can find out more about the range of medical dermatology, surgical dermatology, pediatric dermatology, and aesthetic dermatology services offered by visiting <https://www.kdermatology.com/>.

The Saorsa Swift System is a revolutionary new dermatology therapy that uses microwave radiation to treat several skin conditions. Microwaves have been studied for their medical benefits for decades, and Saorsa has harnessed their power to dramatically change how common conditions such as warts are treated. One of the major complaints with conventional methods of wart treatments, such as laser ablation, salicylic acid, and cryotherapy, is that those therapies are imprecise and do a lot of damage to the healthy tissues surrounding warts. Microwave radiation is different as it travels in straight lines with no lateral spread, and the depth it penetrates the skin can be precisely controlled.

For patients, this means significantly reduced treatment times with no need for anesthesia or post-procedural dressing. Appointments last only 5 to 10 minutes, and most lesions are treated within 2 to 3 appointments

with gaps of 4 weeks between each. The treatment is not typically painful, with patients only reporting mild discomfort, no evidence of scarring, and low post-procedural pain.

Dr. Angie Koriakos, the founder of K Dermatology & Wellness Institute, talks about the safety and reliability of the microwave-based wart therapy by saying, "The Saorsa Swift System is the result of 6 years of continuous research and development funded by private investment and supported by the Scottish government. The microwaves at the heart of the system have been used in medical applications for over 60 years since their discovery due to their non-ionizing nature. The system has also been subjected to extensive clinical testing in the field. Coupled with the experienced and caring team that we have assembled here at K Dermatology & Wellness Institute, you can rest assured that you are getting the best possible treatment for warts that is currently available."

Dr. Angie Koriakos is a Board-Certified Dermatologist in Richardson, TX, specializing in medical, surgical, pediatric, and cosmetic skin care treatments. She graduated Summa Cum Laude from Arizona State University with a Bachelor of Science degree in Exercise Science / Kinesiology and then went on to obtain a Master of Public Health degree with a focus on Global Health from Loma Linda University. Later, she completed medical school in Southern California at the Western University of Health Sciences and finished a three-year dermatology residency training at the University of North Texas Health Science Center, where she served as Chief Resident. Dr. Koriakos has an interest in infectious disease dermatology and is one of the few physicians to have completed a fellowship in HIV dermatology at the University of California, San Francisco.

K Dermatology & Wellness Institute has an impressive overall rating of 4.6 out of 5.0 on its Google Business Profile from over 350 reviews. One of the latest reviews says, "I've been visiting this office the last few years and it's always the same. Efficient and courteous. When they have told you your results will be back at a certain time, they will call me that day to advise me of my results. Prompt service." Another recent review says, "I love Dr. K and her staff. They are always on time, knowledgeable, and friendly. My primary care physician referred me to Dr. K, and I'm so glad! Her office is the best! great doctor and great staff!"
