

Hampton, GA, Podiatrist Modern Podiatry Is Now Offering Saorsa Swift Wart Treatment for Plantar Warts

January 12, 2023

January 12, 2023 - PRESSADVANTAGE -

Modern Podiatry, a foot, ankle, and leg vein specialist in Hampton, GA, has announced that it now offers a brand new FDA Cleared technology for the elimination of plantar warts, the Saorsa Swift system. Readers can find out more about the clinic's full range of services at <https://www.modpodga.com/>.

The Saorsa Swift system harnesses the unique properties of microwave radiation to offer plantar warts therapy that is faster, cleaner, and safer than conventional methods of treatment. Microwave radiation has been studied extensively for decades by the scientific community and its non-ionizing nature makes it particularly suited to medical applications. With the Saorsa Swift System, dermatologists, and podiatrists all over the nation now have a device that can conveniently capture this power and offer their patients a much better experience.

Cryotherapy, laser ablation, and salicylic acid, the conventional methods of addressing the foot condition, are imprecise as they also damage the healthy tissue surrounding plantar warts. Laser ablation and electrocautery treatments produce a plume that is hazardous to both the patient as well as everyone else working at the clinic. Microwaves generated by the Saorsa Swift system are highly localized, travel in straight

lines with no lateral spread, and the depth to which they penetrate the skin can be accurately controlled. So, Saorsa's microwave-based system only acts on the affected plantar warts, making for a cleaner treatment.

Patients report no or very low levels of pain during the procedure which saves costs on anesthesia. After the treatment is over, there is also no need for any post-procedural dressing or padding. Appointment times are also much shorter at just 5 to 10 minutes. This also allows clinicians to book more patients during the day and overall help more patients in their service area. Plantar warts can usually be effectively treated within 2 to 3 sessions with around a month between each successive appointment.

Modern Podiatry is a premier podiatry practice in Hampton, GA, that provides patients of all age groups with several foot and ankle services such as plantar fasciitis, diabetic feet, foot, and ankle surgery, foot pain, fungus, foot, and limb salvage, venous insufficiency, sports medicine, wound care, injectables, and more. The clinic accepts most insurance providers and specific coverage information is available upon request.

The clinic was founded by Dr. Kibibi Wanzu, DPM, a Georgia native who received her doctorate in podiatric medicine (DPM) on an academic merit scholarship at Temple University School of Podiatric Medicine and her medical training at the U.S. Department of Veterans Affairs where she was chief resident. The clinic's other provider, Dr. Brittany C. Sumpter, DPM, is currently Board Certified by the American Board of Podiatric Medicine. She attended Temple University School of Podiatric Medicine and completed her residency in Brooklyn, NY, at The Brooklyn Hospital Center, where she served as Chief Resident.

The clinic has received several 5-star reviews from patients it has served over the years in Hampton and all of surrounding Henry County. One gracious review tells the story of a patient who had been suffering from rashes on her feet for over 5 years. The reviewer shares that most dermatologists and podiatrists she approached were not determined enough to diagnose the root cause of her foot problems. Finally, Dr. Kibibi took upon the challenge and used her cross-domain knowledge and research skills to correctly identify that the patient suffered from an IUD allergy. The patient thanked Dr. Kibibi in her review by saying, "I cannot thank her enough for her determination and quick response. She has been amazing! I could never express the peace of mind she has brought me, or how thankful I am to her for all that she has done for me."

Hampton, GA, residents can get in touch with the staff at Modern Podiatry at (470) 275-1971 to book appointments. The clinic also welcomes walk-ins and same-day appointments from 8:30 AM to 4:30 PM from Monday to Thursday and between 8 AM and 12 PM on Friday.
