

Pembroke Pines Landscaper Discusses the Many Different Irrigation Services They Now Offer

January 09, 2023

Pembroke Pines, Florida - January 09, 2023 -
EPS Landscaping & Tree Service LLC has established a solid reputation for doing a great job when it comes to residential and commercial landscaping in Pembroke Pines. Among the lawn care work that it does which customers report being very satisfied with is the irrigation services that this company offers. Something very important for home and business owners in Broward County because of the uneven rain patterns in the area.

Greg O'Connell, who co-owns the business with his wife, says, ?When I look back to when I was a little younger, one of the things that I remember is spending many hours in the yard helping my parents try to keep our lawn watered and then doing the same thing when I owned my first home. If I only knew what I do now about the benefits of having an automatic irrigation system. That?s why I get a big smile on my face every time a customer decides to have us install a new irrigation system for them. I know how much easier their life just became.?

O'Connell went on to say that of course their bread & butter irrigation service is the design and installation of these systems. They can do that in several different ways. He says just like buying a car, irrigation systems can be simple but effective and budget friendly or they can come with all the bells and whistles and have a higher price tag. It does not matter to him which way a customer chooses to go because they always design their irrigation systems to fit a customer?s budget and needs. He added that although the irrigation systems that they install are among the best made, if they do happen to break down their irrigation repair specialists will respond quickly and get the system working properly again. The company owner also talked a little bit about the benefits that having an irrigation system offers. As was mentioned earlier, it all starts with savings of the amount of time a home or business owner spends on their lawn taking care of it. Automatic sprinkler systems also help conserve water as opposed to sprinklers that will run until the water feeding them is manually turned off. Irrigation systems also help to prevent such harmful lawn conditions as overwatering, underwatering, uneven watering, and making a lawn too mushy.

Because of the effort that EPS Landscaping & Tree Service LLC puts into its irrigation and other landscaping services, the company has received many glowing reviews from its customers. D.S. proclaimed, ?Best landscaping company I have ever come across hands down! The owners are extremely responsive and have the best customer service; really the best I have ever experienced!! If you are looking for a landscaping company these folks are it! Thank you, Greg, and Jessica, for such wonderful service week after week. It is truly a pleasure doing business with you guys.? Kahuna6009 stated, ?We have had a great experience with EPS Landscaping. Jessica and Greg are easy to communicate with and their crew is great. They do a good job cutting, edging, and trimming. They also always clean up before they leave the property. Love the billing system allowing payments online too.? Reviews like these help to explain why this company has an average review rating of 5 out of a possible 5 stars on its Google Maps Business Listing.

Besides Pembroke Pines, EPS Landscaping & Tree Service provides its irrigation and other essential landscaping services to those in such Broward County locations as Coral Springs, Dania Beach, Deerfield Beach, Fort Lauderdale, Hallandale Beach, Hollywood, and Pompano Beach. O'Connell says that he is always happy to meet with a customer to discuss getting an irrigation system installed or to go over the other landscaping and tree services that EPS Landscaping & Tree offers. This includes a wide variety of expert lawn care tasks, landscape design in Southwest Ranches, and tree trimming & planting.
