## **Customer Finds Mattress Wedge Can Help With Acid Reflux**

*December 09, 2015*

December 09, 2015 - PRESSADVANTAGE -

Reflux Guard© is proud to announce that one of their customers has seen a notable improvement in her acid reflux symptoms after using their mattress wedge. Acid reflux is a very uncomfortable condition that is often made worse by improper body positioning. This customer observed that she was able to use the wedge to position herself while in the supine position in such a way that the symptoms of acid reflux were substantially reduced. The customer sent the company a thank you letter, which also highlights the customer's use of a Cequal reading pillow. Her testimonial letter can be seen on <http://www.refluxguard.com/testimonials>.

Tommy Stern from Reflux Guard© says: "Our goal was to create a product that enhances people's comfort when they are sleeping. It is a known fact that proper sleep is vital to overall good health, so we knew that there would be some benefits in using our wedge. We are happy to hear that people with acid reflux have noticed an improvement in their condition as a result of using our wedge."

"As soon as I started sleeping on your Reflux Guard mattress, I began to sleep much better and had much less acid reflux," says Mrs. R. Goldberg. "I also bought a Cequal reading pillow so that, even while resting, I could do so sitting up for the first three hours after eating a late meal, when necessary."

While the company's main focus is on the mattress wedge, they make themselves available to talk to each of their clients individually to share best experiences on the best way to treat their condition. For instance, in the case of Mrs. Goldberg, they also suggested seeing a sleep specialist if a CPAP machine would offer additional help. In addition, they suggested certain books and publications to better understand her condition. People are encouraged to contact the company through <http://www.refluxguard.com/> to receive more information.

"I wish I had taken your advice earlier and read the book 'Sleep Interrupted' by Steven Y. Park, M.D.," says Mrs. R. Goldberg. "It described all my symptoms in detail and, above all, explained why they were happening - something that none of my doctors had previously taken the time to do."

In order to help people find the best product for their particular needs, Reflex Guard© has launched a section on their website where products can be compared. This section is accessible at <http://www.refluxguard.com/product-comparison>. Customers are encouraged to use this section in the first instance in order to find out how they can improve their condition.
