NAS Releases New Video On HVOF Thermal Spray Equipment

November 30, 2015

November 30, 2015 -
National Alloy Solutions (NAS), a business in Houston, TX, has recently released a new YouTube video that highlights their services, particularly their high velocity oxygen fuel (HVOF) thermal spray equipment. The video introduces the company and explains why they are true experts in their field. The company, with website at http://nationalalloysolutions.com/, has also used the opportunity to properly introduce themselves to their market.

"We offer a wide variety of Thermal Spray Technologies and Coating, HVOF Powder, Wire arc spray, Spare parts, and Industrial Supplies to companies throughout the United States and the World," says Charles Felchak from National Alloy Solutions. "Centrally located in Houston, Texas in the heart of the oil and gas industry, NAS strives for 100% customer satisfaction by offering honest reliable sales and service."

The company's location plays a vital role in providing excellent services. Because they are in Houston, TX, they are quite literally in the heart of the oil and gas industry. They also pride themselves on hiring only the most qualified people, who are able to address any issues a customer may have.

Through the video, the company has taken the opportunity to provide some more information on HVOF Powder in particular. NAS offers a full range of powders and coatings to the industry. These include HAI MCrAlYs, metal alloys, carbides, ceramic oxides, and precious metals along with custom engineered, APT and proprietary HAI powders for even the most demanding markets.

NAS does more than that, however. They also offer a dust collection system, robotics, acoustical rooms, chillers, and any other equipment requested to add to an existing coatings facility or starting from the ground up. Currently, NAS works together with hundreds of companies throughout this country, but also the rest of the world. Their clients include petrochemical, airline, pulp and paper, and aerospace to name few.

The company is committed to offering the highest quality service and customer satisfaction. They are quickly becoming a global leader in their field. They also encourage everybody to give them a like on Facebook at https://www.facebook.com/National-Alloy-Solutions-914781515235376/. This will give people the opportunity to join in on the conversation, ask questions and otherwise get to know NAS.
