The Art of Dentistry Lives Up to Its Reputation as the Best San Diego Dentist Clinic

January 18, 2023

January 18, 2023 -
The Art of Dentistry, a San Diego-based dental clinic, is restoring smiles through its unique combination of highly experienced dental professionals, cutting-edge technology, and compassion for patients.

Located just a few blocks away from San Diego?s historic Balboa park, The Art of Dentistry offers the city?s residents a range of general, implant, and cosmetic dental services. The clinic?s dental professionals focus on taking care of a patient?s holistic health, emphasizing the transformative effect that restorative dentistry can have on their self-esteem and overall well-being. The clinic?s dentists go to great lengths to understand each patient?s health goals and then use their years of dentistry experience to recommend procedures that get the desired result.

This dedication to the patient experience is backed up by specialized high-level care, unlike anything that competing San Diego dental clinics provide. Patients recognize The Art of Dentistry as the best San Diego dentist and haven?t held back their praise for what it was able to help them achieve. On its Google Business Profile, the San Diego restorative dental clinic has an almost perfect overall rating of 4.9 out of 5.0 from over 60 reviews.

One of the latest reviews says, ?This office and these professionals are amazing, from the dentists to the office manager, to the support staff to the hygienist. It is by far the best total dental experience I ever encountered. They were recommended by my dentist in LA when we were moving to San Diego, and we are grateful for the referral. Dr. David Landau is my dentist, and he is as close to perfect as you can get in a dental practice. He patiently explains everything and consistently goes above and beyond expectations - including an evening call after a procedure to make sure all is well and to answer any questions. I can't imagine anyone being disappointed with their services. This is as exciting as is possible -- about a dental office!?

The San Diego cosmetic dental clinic is led by Dr. Addleson and Dr. Landau, two accomplished veterans in the field who specialize in cosmetic, restorative, and reconstructive dentistry. Dr. Addleson is one of only 45 dentists in the world to earn the title of ?Accredited Fellow? from the American Academy of Cosmetic Dentistry (AACD) while Dr. Landau is one of only 400 to receive the ?Accredited Member? credential from the same organization.

The Art of Dentistry offers patients gum disease treatment using minimally invasive Laser Gum Surgery. Patients who experience dental anxiety, a fear of needles and drills, sensitive teeth, dental phobia or have a low pain tolerance or sensitive gag reflex, can benefit from the clinic?s sedation dentistry services. The patient's fears are put to rest as they are not necessarily completely put to sleep using anesthesia but instead made to feel relaxed and comfortable throughout the process.

For patients who are looking to restore their healthy smile, The Art of Dentistry offers Same-Day CEREC appointments. They are recommended to patients facing conditions such as large fillings, excessive wear, cracked teeth, broken cusps, root canals, and more. In just one office visit, patients can get fitted with CEREC crowns, bridges, and veneers. There is no need to install a temporary crown and come back again for a later appointment. The fabrication of the new restorations is done in-house using digital impressions leading to a much better result than is possible using traditional molds. The high-quality CEREC crowns are also more natural looking and durable.

New patients at The Art of Dentistry can expect to get dental treatments following the clinic?s exclusive 7-step design process. It starts with a preliminary examination where the patient?s needs, desires, and medical history are understood. This is followed by the diagnostic phase, treatment plan presentation, and treatment plan phase-in. Step 5 is the execution of the proposed treatment plan. Finally, steps 6 and 7 are completion and follow-up respectively where the dentists check up on the patient to ensure the treatment worked as expected.
