

Hydra Facial Syndeo Available at the Medical Spa at Mansfield Cosmetic Surgery Center

March 27, 2023

Mansfield, Texas - March 27, 2023 - PRESSADVANTAGE -

Mansfield Cosmetic Surgery Center, a Texas-based cosmetic surgery center and Medical Spa, is enhancing its mission to provide the best medical spa treatments to its clients by introducing the Professional Series HydraFacial Syndeo. This new delivery system is the most advanced for the HydraFacial medical device platform and aims to personalize the experience to each client's needs.

The Medical Spa at Mansfield Cosmetic Surgery Center has been providing HydraFacial MD for many years, which has become the defining standard for skin hydration and exfoliation technology. The Professional Series HydraFacial Syndeo takes this process to the next level by utilizing its patented 4-in-1 Vortex-Cleansing-Technology, Hydro-Peel Exfoliation, Vortex Extraction, and Vortex Fusion to exfoliate, refresh, and revive any skin type. The final result is the most comprehensive cleansing possible.

Because Mansfield Cosmetic Surgery Center is a surgical practice with Dr. Michael L. Thornton as the Surgical Director, clients can be provided with medical-grade boosters as add-ons to the HydraFacial Syndeo system. Thus, two medical grade boosters are offered: 1) ZO Brightalive Booster that reduces the appearance of brown spots, evens skin tone, prevents new pigmentation formation, restores hydration to

replenish your skin's vital hydration balance and is great for customers who have melasma and 2) Glytone AHA Resurfacing Cellular Booster that treats skin texture irregularities and post-inflammatory hyperpigmentation (PIH) by using a unique combination of three alpha hydroxy acids (AHA's) and provides clients with a radiant and glowing complexion.

To preserve and improve the quality of each subsequent treatment, the HydraFacial Syndeo now features a digitally connected platform that tracks each treatment, enhancing all future treatments. Clients no longer need to track their own progress as data on their treatments will be securely saved to the cloud, providing their licensed medical esthetician with a direct record of their HydraFacial Syndeo treatment history.

Overall, HydraFacial is a gentle and effective treatment that causes less swelling than manual extraction techniques. The patented vortex hydrating technology provides a vacuum suction extraction of the pores, making it ideal for most clients. The HydraFacial Syndeo also provides LightStim Elipsa LED light energy therapy to target wrinkles, inflammation, and acne-prone dermatitis, allowing clients to complement their treatment with medical-grade enhancement boosters made with carefully selected ingredients such as peptides, antioxidants, and brightening agents.

HydraFacial Syndeo can be performed on all skin colors and types, and there is no additional health risk of pigment discoloration or scarring. Clients can resume their usual activities immediately after the treatment, making it a convenient option for those with busy schedules.

The Medical Spa at Mansfield Cosmetic Surgery has a proven track record of providing exceptional care and encourages interested clients to book an appointment with their Texas Licensed Medical Esthetician by calling the office or visiting the Mansfield Cosmetic Surgery Center website.
