Greater Lexington Premier Lighting Company Says Now is the Perfect Time to Arrange Having Outdoor Lighting Installed

January 17, 2023

January 17, 2023 -

Nicholasville, KY-based Blingle Premier Lighting has been taking care of the exterior lighting needs of its customers in the Lexington area for many years now. They specialize in providing such outdoor lighting as permanent lighting, holiday lighting, and landscape & patio lighting. The company also does more unique outdoor lighting tasks too such as those required for events and lighting for commercial properties. The company's well-trained and experienced crews have accumulated much knowledge when it comes to the lighting trends that take place in the Lexington area. This is why Blingle Premier Lighting recognizes that the busy spring outdoor lighting installation season is fast approaching. That?s why those at the company say now is a great time for homeowners to call Blingle Lighting and discuss having the company install a custom outdoor lighting system for them.

A representative of the company says, ?We at Blingle hardly ever get a chance to take a break, and that?s the way that we like it. Now that the busy fall and Christmas holiday lighting season is over, next up will be many customers wanting to install outdoor lighting in the early spring. That?s why we encourage those that are looking to get outdoor lighting installed in the Lexington area, to get a jump on things and talk to us now

about their outdoor lighting needs.?

Blingle Premier Lighting?s company representative went on to state that all one has to do to realize what outdoor lighting can do for the looks of their home is to take a walk or a drive through some neighborhoods at night. If they see a home that has lights that are brighter and placed more strategically than the homes around it, chances are that home's outdoor lights were installed by a team of professionals. He added that it really does matter when outdoor lighting is installed by professional companies such as them because they use brighter lights that can be seen from further away, better fixtures, and better light cords. It was also mentioned that their extensive lighting design experience allows them to place lights where they will highlight the beauty of a home?s architecture and landscape features. This includes patios, decks, porches, gazebos, outdoor pools, roof ridgelines, pathways, and lighting for outdoor bar and kitchen areas. The company has the skills and equipment necessary to place outdoor lighting just about anywhere that a customer wants to add it.

The company representative says that often they will work with a homeowner?s vision for their outdoor light placement and then use their many years of design and installation experience to fine-tune that homeowner's vision to bring it to fruition. Blingle Premier Lighting?s customers also can choose from pre-designed outdoor lighting packages that have been proven to work or have a complete custom outdoor lighting design done for them. They use innovative technology that will let the customer see approximately what their new outdoor lighting will look like before the job even commences. He says that way they can make little tweaks here and there to ensure the customer is satisfied with the final lighting design. It?s a simple but effective process that has been proven to work time after time. This is also part of why Blingle Premier Lighting is considered to be a company that has world-class customer service.

Homeowners that have had Blingle install outdoor lighting on their Lexington area homes often leave very favorable reviews of the company?s services. Jeff Smith simply stated, ?Blingle did a great job! I highly recommend them.? That 5 out of a possible 5-star review was accompanied by a high-resolution photo of the customer?s house nicely lit up by his new Blingle outdoor lighting. This review along with the accompanying photo can be seen on the company?s Google Maps Business Listing. The company representative invited those in Lexington and the surrounding areas that are considering getting outdoor lighting to take a look at the extensive photo gallery of their work that is on the company website.
