

## **Tampa Pest Control Is Fighting Pest Problems to Prevent Property Damage and Save Lives in Tampa**

*July 18, 2024*

July 18, 2024 -

Tampa Pest Control is offering professional, reliable, and cost-effective pest control services to the city's homeowners. The company's range of pest control services includes treatments for common household pests, bed bugs, termites, and more. It also offers lawn treatments for property owners who want to fortify their front and back yards.

Just like people from all over the country move to Florida to enjoy its humid subtropical climate, the same favorable conditions also attract pests of all kinds. The problem is so widespread and acknowledged that Orkin even placed Tampa at #41 on its 2023 list of the top 50 cities with bed bug problems. Moreover, the city also landed at #50 on the list of the most rat-infected cities in the country in 2022. The same applies to other pests such as termites, roaches, ticks, house flies, fleas, and others.

Pests also constitute a public health issue. While some might qualify them as just a minor nuisance, a large portion of the population falls victim to the diseases that they are transmitting agents for. The EPA, in

collaboration with the USDA and CDC, has published a list of the pests that are of significant public health importance. It lists the dangers of vector-borne diseases, asthma and allergies, and microbial diseases and infections.

The spokesperson for Tampa Pest Control talks about the need for effective pest control in the region by saying, "While most Floridians consider this great state a slice of heaven for building a better future in, it also comes with its own share of problems. Pests thrive in Florida's climate posing both a structural risk to your property as well as a health risk to those living in it. To make sure that your home, business, and loved ones are safe, make sure to inspect your property for pests regularly. Catching the problem earlier gives professionals like us an advantage. We can then remedy your pest problems before the situation gets out of hand. By having a systematic pest control strategy involving inspections and regular treatments, your home and your health will be in pristine condition for decades."

Tampa Pest Control, which has been serving the city for over 10 years, offers customers several benefits that other pest control companies in Tampa just can't match. Its highly trained pest control technicians are available to deliver fast same-day service for property owners facing an emergency. Recognizing that some of its customers might be allergic to or might be concerned about the negative impacts of conventional chemicals, Tampa Pest Control only uses organic environmentally safe pesticides that are safe for humans and pets alike. The company also offers detailed inspections that leave no stone unturned in determining the true extent of the pest infestation. After the company applies its recommended treatments, homeowners can expect noticeable results within 24 to 48 hours.

Apart from Tampa Pest Control's technical proficiency in all kinds of pest control services, customers also appreciate the company's friendly customer service. The testimonials it has received for its work, which are highlighted on its website, reflect this. One reviewer says, "Great service thanks to Tampa Pest control. I was happy with the service provided. They were quick to contact me initially, happy to help me to have this service done asap. We were also glad that we didn't have to leave the house to have the pest control done. I'm happy to recommend my friends and family about this service." Another customer recounts their experience by saying, "Reliable, honest, knowledgeable. Highly recommended. Looks after my grandchildren's place as well. Very happy client!"

Readers looking for effective pest control solutions can contact Tampa Pest Control company at (813) 328-5787 or [info@tampapestcontrolcompany.com](mailto:info@tampapestcontrolcompany.com) to book an appointment or for a free consultation. The company's working hours are from Monday to Friday from 7:30 AM to 4 PM. As of the time of writing, first-time customers can avail themselves of a \$50 discount on all inspections and treatments.
