Premier Outdoor Lighting Company Illuminates Southwest Charlotte

January 25, 2023

January 25, 2023 -
Southwest Charlotte, NC based Blingle Premier Lighting would like to get in touch with Charlotte locals who might be looking for a company that installs and maintains outdoor lighting. Blingle provides a wide range of lighting options for both homes and businesses, and with their team of committed experts, they can help their clients' goals come to life and create lasting memories for years to come. They provide seasonal lighting, permanent lighting, event lighting, landscape illumination, patio lighting and business lighting (among others). They are always happy to demonstrate how they came by their status as one of the top lighting businesses in the region.

They offer attractive and practical lighting for patios, decks, porches, gazebos and a variety of exterior locations with their landscape and patio lighting services. According to the business, "The Blingle team of professionals will utilize our outside lighting portfolio to blend beauty and utility for your home's patio and landscape demands. With tough, weather-resistant lighting that can withstand even the harshest circumstances, you can highlight the stunning features of your home's architecture and design the ideal outdoor space. Let us assist you with your upcoming project for premium lighting.?

Every time they work on a lighting project, Blingle follows a thorough and effective procedure to ensure that their clients' needs are met and that the job is done correctly the first time, from consultation through insulation. There are seven steps in their lighting installation process: consultation, lighting demo, written proposal, contract, scheduling, installation, maintenance and takedown. The consultation phase may be carried either in person or remotely. Blingle's design experts examine the project and work with the client during a consultation to create a digital, visual representation of the property in question so they can see how it will look once the project is finished.

Once all of the design components have been determined, the next phase begins. They create a lighting demo using all the images their team took onsite, and it is at this point that any tweaks may be made to ensure a precise execution depending on the client's comments and required revisions. After that, Blingle will provide a formal proposal for consideration that includes cost estimates and necessary services. Blingle Premier Lighting will create a formal contract agreement and schedule the installation if the client agrees.

According to Blingle, "Our Blingle lighting experts will visit the designated site on the day and time of your planned appointment to start your project. You are not required to be present on installation day, so when you get home, be prepared to see a lit-up paradise. At Blingle, we are proud of the top-notch lighting projects we have completed, and we stand by the caliber of our work. If you ever experience any problems, please get in touch with us so that our lighting specialists can fix your problems ? at no extra charge. We provide both workmanship and product warranties on all of our services. Blingle also assists with removal after the event, or if a client requests that their lights be turned off. The objective is to provide the client with coverage from installation to takedown and storage, respectively. Those who hire Blingle to install their end-of-year event or holiday lights, for instance, can request that the crew remove them in early January (or other convenient time).

Many satisfied clients have given the business glowing feedback. Jeremy Z. says, ?Ethan from Blingle came out and gave us a quote this last November. He was great at hearing what we wanted and recommended some things for us. Everything turned out great and looked great. We didn?t have any problems with any of the lights, and we live on top of a hill, so it?s pretty windy all the time in the winter. They came out and took everything down in January. Very happy with everything, and will definitely be using them this Christmas season!?

Clients can visit the company's official website for additional details about Southwest Charlotte North Carolina's premier outdoor lighting company. Additionally, they can get in touch with company representatives directly by phone, email and other means.
