

Tele Medicine - 30 Day Free Trial Launched

November 27, 2015

November 27, 2015 - PRESSADVANTAGE -

Medicus Global has launched a new Doctors by Phone 24/7 service. This service enables people, insured or uninsured, with or without preexisting medical conditions, to contact a doctor around the clock from the comfort of their own home. The service is already proving to be very popular.

"We wanted to create a very accessible medical service right at someone's fingertips," says John Lawrence from Medicus Global. "It is said the American Medical Association believes 70% of all doctors' visits are unnecessary and could have been treated through a telephone consult. This equates to a huge amount of time. By signing up to Medicus, members can access a doctor around the clock from the comfort of their own home."

Essentially, the system known as 'Tele-Medicine. Get Answers Now.' is like a replacement physician. Members and their family are covered, even when they are traveling. As a result, people no longer have to take time off work for what are actually non-emergency medical procedures. It means they no longer have to stand in line surrounded by sick people or wait for a number of days to get an appointment. Additionally, members will receive a prescription drug discount card. This could help them save as much as 70% on their prescriptions.

"I have been using the Medicus service for some time now and I couldn't be happier," says Mary Shipman, a happy Medicus patient. "No longer do I have to wait until my illness is actually over before I get to see my physician. No longer do I have to sit and share space with people with whom I could contract other disease. Plus, I am saving loads of money with the discount prescription card. If you need a lot of medication, like myself, you could even see a return on investment."

Medicus is currently available with a free 30 day trial. This will enable people to get to know the system, how it works and what it can do for them. John Lawrence believes anyone who uses the free trial will love it and will most likely sign up for a full subscription.
