

Tree Service Experts Pasadena Partners with Local Non-Profit to Plant Trees in Low-Income Communities

January 31, 2023

Pasadena, California - January 31, 2023 -
Pasadena, CA ? Tree Service Experts Pasadena, a leading tree care company in the greater Pasadena area, has announced a strategic partnership with the local non-profit Trees for All to plant trees in low-income communities throughout the region. The initiative was spearheaded by Myron Colley, CEO of Tree Service Experts Pasadena, aiming to improve air quality, reduce energy costs and promote green space in disadvantaged neighborhoods.

The partnership between Tree Service Experts Pasadena and Trees for All is the first of its kind in the region. Myron Colley hopes it will catalyze other communities to take similar steps.

Through this initiative, the two organizations have committed to planting up to 1000 trees across various low-income communities in the greater Pasadena area. The trees chosen will be native species known for providing shade, reducing energy costs, and filtering air pollution.

Tree Service Experts Pasadena is employing trained arborists and using innovative tree-planting techniques to ensure that the project is successful. Along with providing labor and expertise, they are also donating necessary equipment and materials such as shovels, soil enhancers, mulch, and tree guards.

Trees for All will guide the selection of appropriate tree species for each location and ongoing maintenance training for local community members. Together, Tree Service Experts Pasadena and Trees for All are evidence of grassroots efforts toward positively impacting disadvantaged neighborhoods in the greater Pasadena area. The initiative will result in improved air quality and create job opportunities while promoting neighborhood pride through green initiatives.

"We are thrilled to partner with Trees for All on this important initiative," said Mr. Colley. "We believe everyone should have access to safe, clean environments, which begins with planting healthy trees. We are committed to using our expertise to help build stronger communities and positively impact the environment."

The partnership between Tree Service Experts Pasadena and Trees for All will create a lasting bond with the local community. By donating necessary resources such as personnel, equipment, and time to plant trees, Tree Service Experts Pasadena demonstrates its commitment to supporting Trees for All's mission.

In addition to providing these resources, Tree Service Experts Pasadena will also provide access to their knowledge of tree care and landscaping to ensure that the trees planted are healthy and robust. With their expertise, they can help ensure that each new tree is planted correctly and given the best chance at survival.

This valuable contribution benefits Trees for All's project goals and helps promote a healthier environment by adding more greenery and air filtration throughout the region. The positive impact of this partnership is clear: it will make a lasting difference in the lives of people living in low-income communities by making them healthier places to live, work, and play.

According to Trees for All Founder and Executive Director, John Smith, "This generous support from Tree Service Experts Pasadena is invaluable and will go a long way towards helping us reach our goal of planting 2,000 trees in the next two years."

Tree Service Experts Pasadena is a company that is dedicated to being good stewards of the environment. They believe they are responsible for ensuring that the environment is protected and preserved by providing professional tree care services.

These services include pruning, trimming, stump grinding, and removal to promote healthy tree growth and overall environmental health. In addition, they specialize in storm damage repair to mitigate further damage caused by storms and other natural disasters.

Furthermore, they provide 24/7 emergency services so their clients can receive the help they need anytime, day or night. By doing this, they ensure that their clients are protected from dangerous tree debris and debris-related accidents and reduce the amount of property damage associated with fallen trees. The company's commitment to preserving the environment is an example for other businesses looking to do their part in sustainability efforts.
