New Doomsday Prepping Tactical Flashlight Released

December 03, 2015

December 03, 2015 -
Perfectly Vivid, a business in Coronado, CA, has recently released their new tactical flashlight that is particularly suitable for those who are involved in doomsday prepping. In addition, it is equally suitable for domestic users and those who simply like to be in the outdoors. Full details are available through http://perfectlyvivid.com/.

"Our tactical flashlight has been designed to provide people with a ray of light, exactly when they need it," says Dr. Christopher Vogelmann from Perfectly Vivid. "Our product has proven to be very popular with doomsday preppers, because it is such a multifunctional tool. It functions as a flashlight, of course, but also as a self-defense tool."

The product is a tactical flashlight with a high lumen that allows for a long lasting battery lifespan. It can be used in a variety of applications, from a simple torch in the home during power outages to a powerful tool to have during outdoor pursuits to night camping to industrial building maintenance and more. The flashlight has been designed to be ultra strong and durable. In fact, Perfectly Vivid claims that their product could be run over by a truck and still function.

"I was building my bug out bag and needed to decide on which flashlight to include," says Lou-Anne Strimmer. "After much research, I settled on the Perfectly Vivid model and I'm so glad I did. It is lightweight, durable and very portable and doesn't eat up a ton of batteries while at the same time emitting enough light to brighten up a street. In fact, I loved it so much that I purchased another one to keep at home."

Perfectly Vivid encourages everybody to give their Facebook page a 'Like' on https://www.facebook.com/perfectlyvivid/?fref=ts. This provides an opportunity for people to ask questions or to share their own experiences with the flashlight. Furthermore, it will enable them to be kept up to date with further product developments, special offers, sales and discounts. The flashlight is currently only available for sale through the Amazon platform, but if further selling platforms are added, Facebook users will be the first to know.
