

Pembroke Pines Landscaping Service Provider Gets Another Five Star Review

February 27, 2023

Pembroke Pines, Florida - February 27, 2023 -
EPS Landscaping & Tree Service LLC, a company located in Pembroke Pines, FL, is excited to announce that they have once again received another five star review on Google and that their overall rating is still 5.0 out of 5 stars. They pride themselves in providing quality services to the South Florida Tri-County area for all types of landscape design, tree trimming, lawn care, irrigation, pest/weed control needs, and tree installation or removal. They consider their highly positive reviews as an indication that they are on the right track in their goal of providing the best quality service by paying careful attention to every detail.

In the above-mentioned five-star review, Katie P. says, ?Tim was absolutely wonderful to work with. He and his crew were extremely professional and courteous. They fixed my very old sprinkler system, replaced the pump, replaced the timer and put down new grass in the whole front yard. The quality of the grass and the way it was laid is amazing I?ve had so many compliments. They did everything in two days and worked very hard. I highly recommend them.?

Meanwhile, the humid subtropical climate of Southern Florida means a tropical landscape design is suitable for homes in the Broward County area. EPS offers this kind of landscape design that will employ a significant amount of tropical plants and trees. This kind of landscape design is much more difficult to map out in contrast to other types of landscaping because of the combination of plants that need different kinds and levels of care. For instance, the landscape designer will need to consider how far apart the plant pots would be and the amount of sunlight that is need by each specific plant. Tropical landscaping will typically include: water features like a small waterfall or a pool; lava rock; island decor such as hanging lights and tiki torches; and huge and vibrant leaves.

EPS also provides lawn care services in Southern Florida. Green lawns are a great addition to gardens and they do more than beautify the property. They also increase the market value of the home, decrease soil erosion, and counteract noise and glare. And possibly most of important of all is that a healthy lawn will actively trap and filter out sediments and pollutants that otherwise would contaminate the surface and/or ground water. To ensure a healthy and beautiful lawn, they will provide the appropriate fertilization. This includes the proper timing of putting fertilizers and ensuring the correct amount of fertilizer is used. The incorrect application of fertilizer can cause damage to the lawn. Another important component of lawn care is mowing. This is actually one of the most vital home lawn management tasks especially during the summer to ensure maximum turf health. And finally, there is the irrigation of lawns. Experience and knowledge on the proper irrigation of lawns is essential because both under-watering and over-watering can damage the lawn. Too much watering can keep the grass?s roots in the top few inches of soil, which decreases the ability of the lawn to tolerate stress.

EPS Landscaping & Tree Service is a family owned and operated firm that has offered landscaping, tree care services, and lawn care in the Broward County area for more than 20 years. They are always focused on offering the most affordable prices possible while making sure that the quality of their services is not compromised. They provide their services in Broward County, including Hollywood, Southwest Ranches, Hallandale Beach, Fort Lauderdale, Coral Springs, Dania Beach, Pompano Beach, Deerfield Beach, and Pembroke Pines.

There are a number of factors that make their services distinctive from those offered by similar providers in the area. First is their personalized landscape design that they base on the client?s preferences. Second, they will use creative ideas to deliver a functional space that is also trendy and aesthetically pleasing. Third, they will choose a color scheme that is most suitable for the landscaping and the personality of the client. Fourth, they will consider the least expensive way of providing the landscape desired by the client.

Those who would like to know more about landscape design services in Broward County can visit the EPS

Landscaping & Tree Service website or contact them through the phone or via email. They are open from 8:00 am to 6:00 pm, from Monday to Friday, and from 8:00 am to 3:00 pm on Saturdays.
