Los Angeles Tree Professionals Implement New Water Management Practices to Help Trees Thrive During Drought Conditions

February 21, 2023

February 21, 2023 -
Los Angeles, CA ? Los Angeles Tree Professionals, a leading provider of tree services in the Los Angeles area, has announced the implementation of new water management practices designed to help trees thrive during Southern California's ongoing drought. The company is dedicated to helping local businesses and homeowners conserve resources while ensuring their trees remain healthy and strong.

Los Angeles Tree Professionals has been in business for over 20 years, providing various tree care services to meet customers' needs throughout the Los Angeles area. Their new water management practices are designed to promote tree health while saving water and energy.

These practices include deep root fertilization, mulching, soil aeration, and selective pruning. The company will also conduct periodic inspections to ensure trees get their nutrients and apply proper irrigation. With these practices in place, the company looks forward to helping homeowners and businesses conserve resources while keeping their trees thriving during California's drought.

"We understand how important it is to preserve our resources in this drought," said Dennis Do, CEO of Los Angeles Tree Professionals. "That's why we have developed new water management practices focused on preserving natural resources, reducing waste, and helping trees and plants stay healthy despite the drier conditions."

Implementing these sustainable practices can save money for homeowners and conserve precious resources. For example, reclaimed water can replace potable water for irrigation, reducing drain-off runoff and preventing contamination of local water systems. In addition, collecting rainwater for reuse reduces demand on municipal water sources, which helps to protect valuable groundwater reserves.

Monitoring soil moisture levels with advanced sensors allows homeowners and business owners to precisely adjust their watering patterns, ensuring that they are using the right amount of water at the right time and avoiding over-watering or under-watering trees. By reducing consumption and promoting optimal use of finite resources, sustainable practices help to conserve the natural environment and ensure the availability of fresh water for future generations.

In addition to these water-saving initiatives, Los Angeles Tree Professionals also offers tree trimming, pruning, and removal services using techniques that promote sustainable landscaping. By removing dead wood and promoting healthy growth, they can reduce the demand for water while maintaining the health and beauty of the trees. They also use specialized equipment to safely remove large branches, stumps, and roots without damaging surrounding property.

For more information on the services Los Angeles Tree Professionals offer, visit the company's website: https://www.treeserviceslosangeles.com/.

Los Angeles Tree Professionals is committed to providing expert care for trees and plants in the most eco-friendly manner possible. With their new water management practices, they are helping Southern California residents conserve resources while keeping their trees healthy and thriving.

"We are proud to be able to offer these innovative water-saving solutions to our clients," said Dennis Do. "These practices are essential for preserving our natural resources in this challenging time."

Los Angeles Tree Professionals plans to expand its service to more suburban homeowners. According to the CEO, Dennis Do, expanding services to the neighboring regions will ensure that more homeowners benefit from the company's new water-saving principles. The CEO mentioned that when the plans to expand its services to the suburbs are complete, the neighborhoods that will first benefit from the company's services are Redondo Beach, Newport Beach, Mission Viejo, San Clemente, Torrance, Beverly Hills, and El Segundo.

Los Angeles Tree Professionals is a full-service service provider offering tree trimming, pruning, removal, and plant health care services throughout the greater Los Angeles area. However, the company's base of operation is located at 1033 S Concord St, Los Angeles, CA, 90023. Homeowners interested in the company's services can reach its offices at 323-714-3990 and sales@treeserviceslosangeles.com.
