

Belmont Dental Introduces All-On-4 Treatment to Enhance Oral Health in Perth

February 21, 2023

February 21, 2023 - PRESSADVANTAGE -

Belmont Dental Surgery is proud to announce the introduction of All-on-4 dental implants to their range of services. The procedure is designed to provide a long-lasting solution for patients struggling with teeth that are severely damaged or missing. All on 4 dental implants treatment is an innovative dental procedure that can give patients a brand new smile in just one day.

Dr Kent Tan, spokesperson for Belmont Dental Surgery, said, "Belmont Dental Surgery team is thrilled to be able to offer this innovative dental procedure to patients. All-on-4 dental implants are a more permanent solution than dentures, and they can give patients the confidence of knowing that their teeth are securely in place. With this treatment, patients can enjoy a beautiful, long-lasting smile."

The All on 4 Perth treatment involves placing four titanium posts into the jawbone, which act as anchors for artificial teeth that are then attached to the posts. This solution is perfect for patients who have lost all of their natural teeth, or who have extensive damage to their teeth. This treatment is much less invasive than traditional dental implants and can give patients beautiful, long-lasting results.

Dr Tan added, "At Belmont Dental Surgery, team's aim is to provide high-quality general and cosmetic dentistry in a friendly, relaxed environment. Belmont Dental Surgery offers a full range of general dental services and work closely with dental specialists to ensure patients have access to the best possible oral health care options. With the introduction of All-on-4 dental implants, the Belmont Dental Surgery can now provide an even wider range of services to patients, giving them the smile they deserve."

Belmont Dental Surgery is an accredited dental practice, fitted out to a high standard with digital x-rays and OPG for increased patient safety and convenience. They are conveniently located at 171 Belmont Avenue, not far from Belmont Forum shopping centre, with ample parking at the rear of the building.

Dr Tan also expressed optimism for the future of Belmont Dental Surgery, saying, "The Belmont Dental Surgery team is excited to continue to provide patients with the best possible dental care, and to continue expanding the range of services. With the introduction of All-on-4 dental implants, Belmont Dental Surgery is confident that they can help even more patients to enhance their oral health."

Belmont Dental Surgery has been owned and operated by Dr Ben Campbell since 2000, and the practice has been built on providing high-quality general dentistry in a friendly, relaxed environment. They are not a sales-oriented practice, but they provide a full range of general dental services, and their friendly team is committed to facilitating a good working relationship between patients and their dentist, ultimately benefiting their oral and general health.

The Belmont Dental Surgery provides All on 4 in Perth at 171 Belmont Avenue, Belmont WA 6104, Australia, and can be reached by phone at (08) 9277 3837 or by email at info@belmontdental.com.au
