

Southwest Oklahoma City Contractor Getting Rave Reviews for its Wood Fence Installation Services

March 03, 2023

March 03, 2023 -

Arrow Fence & Shelter LLC of Blanchard, Oklahoma has been satisfying customers in its area with its wide variety of services for many years now. This includes everything from black chain link, PVC, Vinyl, and ornamental iron fence installation. All of which often get glowing reviews from the Oklahoma City area customers that have had these types of fences installed for them.

A recent trend has even seen the company garner many 5-star reviews for its wood fence installation services. Including this one from Ray Hernbrode who said, ?Arrow Fence & Shelter is a real pleasure to work with! If you're looking for professionalism and great pricing, you found the right company.? A representative of this wood fence company says, ?We are a company that always makes sure we go the extra mile for our customers. This is true whether we are installing wood or any other type of fencing material. When you contract with us for any type of wood or other fencing work, you can always expect excellent craftsmanship, the best fencing materials, a 12-month guarantee on our workmanship, and some good old-fashioned Oklahoma customer service.?

According to the company representative, they do not work with the goal in mind of getting 5-star reviews. They know if they do wood fence repair and installation work the right way and then stand behind that work after it's done, highly favorable reviews will naturally follow. He stated their end goal is to never be satisfied with a completed wood fence project unless the customer is satisfied with it too. Other 5-star reviews attest to the fact that this is a wood fence project philosophy that?s working. Roger Blaukat stated, ?I had 500? of privacy fence installed with them and couldn?t be more pleased. This company is very professional, on time, and does quality work. I would definitely recommend them to anyone needing a good fence at a fair price!? Linda Perry proclaimed, ?I am very happy with my new fence as it looks great. The owners of the company are very nice and they even followed up to make sure the new fence was to my liking.?

The company representative said that in addition to doing wood fence repair and installations the right way, they have several different wood fencing options for their customers to choose from. One of the most popular of which is wood privacy fencing. He says that they have many different types of shapes and sizes of wood privacy fencing to offer. A customer can also choose the level of privacy this fencing entails as it can have anything from small gaps between the wooden slats to no gaps at all. He stated that wood split rail fencing is also a very popular option that their customers in the Norman and Oklahoma City areas choose, especially in locations outside the city. This type of fencing is more decorative in nature and other than large livestock, it?s not meant to keep anything in or out. Other more decorative types of wood fencing this company offers include beautiful cedar, stockade, and traditional picket fencing. They will work with a customer every step of the way to help them select the proper wood fence material for their needs and help them stay within their budget desired budget for the project.

The company representative added that all of this has combined to make them a very versatile and popular Oklahoma City fence contractor. He also mentioned that even though synthetic fence materials are capturing more of the market each year, wood fencing continues to remain popular because of all the benefits its offers. This includes it being an affordable fencing material, the fact that it can easily be cut to fit even difficult fence configurations, and it can be stained or painted to match homes and landscape features.

Those in Yukon, Piedmont, Norman, Moore, Del City, Midwest City, Edmond, and other Greater Oklahoma City area locations that want to know more about the wood and other fencing services Arrow Fence & Shelter offers can contact the company by phone, email, or by using the form found on its website.
