

Man Highly Recommends Muse Treatment After Finding Help for Addiction

February 23, 2023

LOS ANGELES, CA - February 23, 2023 -
Los Angeles, California ? Starting drug or alcohol rehab is never easy. Those who struggle with substance disorders often dread the physical and emotional pain they must endure to reach sobriety and face life?s challenges without chemical assistance. In one case, a man who entered Muse Treatment found rehab tough at first but achieved success. In gratitude, he left an enthusiastic five-star review on Google.

?When I got here I felt uncomfortable,? wrote Victor, the successful client. ?When I got to know the staff and people there, they made me feel so much better. Great staff and nurses that are ready to help! I?ll recommend this place to whoever needs help!!!?

Based in Los Angeles, Muse Treatment offers comprehensive therapy for alcohol and drug addiction, including dual-diagnosis treatment for clients whose addiction is accompanied by a mental health or behavioral disorder. Treatment covers the entire continuum of care, from detox to residential and outpatient care and continuing through post-treatment follow-up, with sober-living facilities to ease the transition. Care is

delivered by a team of accredited professionals who include physicians, nurses, behavioral health specialists, addiction treatment experts and fully licensed and credentialed therapists.

As Victor found, these professionals? training and experience are matched only by their empathy and dedication.

The team begins work as soon as a new client is admitted to Muse Treatment. They design a custom therapeutic plan that meets the client?s mental and physical needs. For example, if drug detox is recommended, the client is seen by a doctor and psychiatrist to clear them for treatment. Detox is conducted with a combination of traditional medication and holistic therapies to remove toxins from the body and prepare the client to begin their recovery journey.

Detox is followed by rehab ? residential (inpatient) or outpatient. The residential option is best for clients who can commit themselves to live at the facility during treatment, while the outpatient choice is suited to clients who may have work or family responsibilities they cannot put on hold at night.

Both options include individual therapy sessions combined with group sessions led by an expert from the treatment team. Thoughtful consideration is given to the dynamics created by group members? various personality types, diagnoses and needs. Relevant group topics and other modalities are woven into the sessions to maximize effectiveness in our outpatient program.

Muse Treatment?s program uses strategies to keep its clients from taking up addictive substances again. The strategy includes educating clients and their families on the situations and circumstances that can trigger a relapse. The program?s goal is to help clients develop the tools they need to stay on the path of recovery long after they leave Muse Treatment.

All clients can take advantage of Muse Treatment?s sober-living program. In separate facilities for men and women, clients find a safe space for easing the transition to their homes. Believing that healing is enhanced in a comfortable, welcoming environment, Muse Treatment equips these homes with a variety of amenities to create a family-like atmosphere. All accommodations are shared, to encourage fellowship and accountability. Residents? progress is tracked, including random drug testing. In addition, members come together in weekly house meetings and can participate in 12 Step-integrated groups.

Muse Treatment recognizes that early sobriety is a critical time during the recovery process, and access to support and community is critical. Therefore, its rehab and sober-living programs provide for all treatment needs in a safe and upscale environment allowing for growth, change and recovery.

Anyone seeking comprehensive treatment for drug or alcohol dependence for themselves or a loved one can visit Muse Treatment or call 866-634-6111.
