Lincoln Tree Service Pros Pioneers Revolutionary New Technique for Tree Root Management

February 27, 2023

February 27, 2023 -
Lincoln, CA ? Lincoln Tree Service Pros is proud to announce that they have pioneered a revolutionary new technique for tree root management. This new method of dealing with tree roots is safer and more efficient than traditional methods, making it the perfect solution for any home or business owner looking to keep their trees healthy and thriving.

Lincoln Tree Service Pros has deployed the new technique in several ways, including using specialized saws and root inhibitors to keep roots from encroaching on existing structures. This new technique also reduces the risk of tree roots pushing up sidewalks and buckling driveways, reducing a potentially hazardous situation for pedestrians.

In addition, the new root control method helps reduce the chances of future lawn damage and foundations caused by growing tree roots. The company's revolutionary root management technique offers many advantages over traditional methods. By controlling the intensity and direction of root growth, it's possible to avoid costly repairs and protect against potential safety hazards.

Furthermore, this new technique is much less invasive than other methods and requires minimal maintenance over time. The result is an environmentally friendly solution that provides customers with long-term protection without sacrificing aesthetics.

"At Lincoln Tree Service Pros, we strive to provide our clients with the best possible service when it comes to tree root management," said Selman Homer, CEO of Lincoln Tree Service Pros. "Our team of experts is

well-trained and knowledgeable in the latest techniques for tree root control, and this new method is just one more way that we can help our clients keep their properties safe from any potential damage."

The new technique also uses high-pressure air tools to blow away the soil surrounding a tree's roots. This process eliminates excess soil, allowing for easier access to the roots. Once exposed, the tree roots can be properly managed and controlled using specialized tools such as root saws, grinders, and trimmers. This approach is not only practical but cost-efficient as well. In addition, it ensures that no harm is done to the tree itself.

This innovative approach to tree root management has already been met with praise from customers who have seen the technique's effectiveness firsthand. According to one customer: "I was amazed at how quickly my driveway and sidewalk were cleared of all the roots. It took less than an hour, and I immediately saw the difference. I'm so glad I chose Lincoln Tree Service Pros!"

Lincoln Tree Service Pros continues to provide excellent tree root management services throughout the greater Lincoln area. With their commitment to excellence and customer satisfaction, they will surely become a leader in the industry.

When asked about the future of his business, Homer added: "We will continue to strive to provide our customers with top-notch tree root management services that exceed their expectations. In addition, we aim to ensure all properties in the area remain safe and free from any potential damage caused by tree roots."
