

Discounted Price For The Best Hand Held Milk Frother Wand Available At Amazon.com

March 27, 2015

March 27, 2015 - PRESSADVANTAGE -

Bru Joy has made available what is arguably the best hand held milk frother wand on the market today, at a discounted price at Amazon.com. By using the promotional code 7D49FROT, people can get a 60% discount when purchasing the Bru Joy milk frother wand through the Amazon site.

"Our frother wand is essential to make a perfect hot chocolate or cappuccino for instance," says Laura Chung, from Bru Joy. "We understand that we live in an era where drinking a hot beverage is becoming an art. People expect to be able to have restaurant quality drinks at home, and this is exactly what our wand offers."

The wand has a whisper quiet motor that allows for creamy, frothy milk to be created in mere seconds. It is an incredibly user-friendly device and because it is so small and light, as well as being battery operated, it can easily be taken along on vacations or camping trips, for instance. It also comes with a mounting bracket so it can always be kept next to the kettle or coffee machine, and it cleans rapidly and with ease. Those who want more info can [click here](#) to learn more about the device itself.

"To ensure people feel they are able to try our milk frother", added Laura Chung, "we have made the product available on Amazon, which allows for completely secure shopping. Additionally, we have a very interesting special offer on as well."

By visiting the Bru Joy milk frother's Facebook fan page, customers can get more information about the promotion that is currently running. By using the promotional code buyers will save 60 percent on their order if they shop through Amazon. This means the device currently costs just \$7.95, with free shipping.

Anyone who enjoys a creamy espresso or cappuccino, or who wants to treat the children to a truly beautiful hot chocolate will absolutely love this frother wand. It allows people to create barrista style coffee and to enjoy the drink the way it is supposed to be enjoyed. Naturally, this is only possible by investing in a good quality coffee as well, but the frother will make sure it adds that little special touch that makes a hot drink so

relaxing.

The device runs on two AAA batteries, which are not included with the purchase. Two batteries last for a very long time as the device is so lightweight and the motor is so small. Despite its small size, the frother really does pack a punch and will help people create that beautiful, frothy, steaming cup of coffee with great ease. Naturally, batteries can be purchased from a variety of different locations for very little money, so their absence in the package is no big disadvantage to the frother itself. Plus, since it does come with a bracket to easily hang the device up in the kitchen, the company seems to have redeemed itself.
