Audio Visual Integrator Vizual Symphony Is Providing Comprehensive AV Systems Installations in Glendale

March 07, 2023

Glendale, California - March 07, 2023 -
Commercial audio-visual integrator Vizual Symphony offers innovative systems and technology integration services in the audio and video technology space to businesses and organizations in Glendale, CA.

The company can recommend, design, provide, and install audio and video systems for classrooms, corporate offices, municipalities, museums, congregations, and more across Glendale and nearby areas such as Azusa, San Bernadino, and Riverside. Vizual Symphony's technological solutions include video systems, audio systems, recording systems, lighting systems, control systems, recording systems, and more.

Clients begin by discussing their requirements with a Personal Design Expert in an in-person or remote consultation. Then, Vizual Surveyor, an innovative design tool, takes measurements from photos or videos to create an accurate 3D rendering of the client's space.

Through Vizual Surveyor, clients see their space with the audio-visual integration installation. The software also allows for specifying the installation's finer details, including cable lengths, camera angles, product locations, and more. Planning eliminates ambiguity from designing to installing the fully integrated AV

solution.

During the discovery process, the Personal Design Expert considers the client's current needs and plans for their space. Then, after the Vizual Surveyor evaluation, is the drafting of a design document. And a settlement of the scope of work according to the client's budget. Finally, the company's expert technicians undertake the installation to bring the client's vision to life. The Personal Design Expert will be involved with the client's project from start to finish, ensuring that the installation is completed precisely according to the specifications in the design document.

Clients can also opt for financing options that enable them to afford the installations using a modest monthly payment. Finally, for clients that want a complete solution, Vizual Symphony offers Vizual Shield. This AV-as-a-Service agreement includes consulting, hardware, personalization, installation, SLA contracts, replacements, and recycling.

Vizual Symphony's web conferencing solutions enable businesses to collaborate with partners and team members all over the globe with a seamless, high-quality audio-visual experience. In addition, Vizual Symphony offers digital signage solutions, including LED video walls and digital marquees, for welcome centers and public places needing to communicate relevant information to guests.

Classrooms in schools and universities can use Vizual Symphony's services to enhance learning through interactive presentations that encourage creativity and collaboration. The user-friendly active learning technology ensures more time spent understanding the subject than struggling with the software and hardware. In addition, lecture capture solutions supercharge remote learning by creating on-demand lectures.

Vizual Symphony can also fit large venues designed for group discussions, panel discussions, performances, and other live events with a complete AV integration that satisfies the needs of all attendees. In addition, the turnkey systems provided by Vizual Symphony eliminate worries about setting up before important events or hiring dedicated technicians.

Vizual Symphony uses products from only the best manufacturers in the industry, including Epson, LG, Shure, Sony, Mersive, Vaddio, Visix, SpineTix, Ergotron, Huddly, Stem Audio, Bose, BMS Anchorpad, Kramer, Da-Lite, Crestron, Biamp, Panasonic, BenQ, and more. Its featured products include the Brightline ZELo, a studio-grade lighting solution that blends in any ambient room light environment. BenQ's RP02, an interactive touchscreen display, whiteboard with cloud features, and a germ-resistant screen, and the MFT6024, a modular folding table system ideal for training and conference rooms, also feature products.

Southern California clients who want a first-hand look at Vizual Symphony's capabilities can head to the website to view its work for past clients. An extensive gallery of images from recent integration projects is on

the site. In addition, the company also provides case studies for its design and installation services to Haven Church, Azusa Pacific University, California State University, and the New Center for Psychoanalysis (NCP), Los Angeles.

Readers can contact Vizual Symphony at (626) 229-9112 or visit their website at https://vizualsymphony.com/ to get started with its comprehensive AV systems integration services.
