

Moorooka Dental Care Now Provides Dental Implants in Brisbane

February 28, 2023

February 28, 2023 - PRESSADVANTAGE -

Moorooka Dental Care now provides dental implants in Brisbane, offering a reliable solution for those who have lost their teeth. The dental clinic has been serving Moorooka, Tarragindi, and surrounding communities with high-quality and affordable dental services for years, and now adds dental implants to their range of offerings.

"A dental implant is a small titanium screw that replaces a missing tooth in the jawbone. Dental implants serve as solid anchors for replacing a missing tooth or set of teeth. These implants allow patients to perform critical functions like maintaining natural-looking, natural-feeling, and natural-functioning teeth, eating almost any type of food they want, maintaining the shape of face, allowing them to smile with self-assurance, and preventing bone loss caused by missing teeth," said by Dr Zaheer Kadwa, a dentist and spokesperson for Moorooka Dental Care.

Dental implants Brisbane are made of titanium, a strong metal that is compatible with the human body. The implant is placed in the jawbone, fusing with the bone over time, which creates a strong and stable foundation for the new tooth. Once the implant has fused with the bone, a small metal post is placed in the implant,

which will support the new tooth. The new tooth is made to match the natural teeth and placed on the post.

The dental implants Brisbane procedure at Moorooka Dental Care begins with an initial consultation. During the consultation, the dentist evaluates the mouth and jawbone to determine if the patient is a perfect candidate for dental implants. They also discuss the patient's goals and expectations for the procedure.

The next step is to place the implant, which is done in the jawbone. After the implant has fused with the bone, a small metal post is placed in the implant to support the new tooth. The final step is to restore the tooth. The new tooth is made to match the natural teeth and placed on the post.

"After the procedure, taking care of dental implants is important. Patients will need to brush and floss teeth with natural teeth. They will also need to see the clinic for regular checkups and cleanings," added by Dr Zaheer Kadwa.

Moorooka Dental Care has a wide range of services to cater to their patients, including preventative care, cavities and fillings, dental emergencies, root canal treatments, crowns, veneers, wisdom teeth, extractions, implants, bridges, dentures, and teeth whitening.

"Moorooka Dental's mission is to provide comfortable, affordable, and pain-free dental services with a high importance placed on patient education and quality treatment outcomes to the Moorooka, Tarragindi, and surrounding communities. A visit to the dentist can be nerve-racking and prone to fear. However, at Moorooka Dental Care, the team will always prioritize patient's needs, treat them with the utmost kindness, and strive to establish a pain-free atmosphere that will alleviate any fears that patients may have," says Dr Zaheer Kadwa.

Moorooka Dental Care offers easy and free parking available outside their premises. The dental clinic also has a HICAPS facility that allows their patients to immediately claim their rebate on-site. They are preferred providers for Medibank, BUPA, HCF, NIB, and CBHS, which means minimal or no out-of-pocket costs for necessary treatments for members of these health funds. They also bulk bill all eligible children under the Child Dental Benefits Scheme (CDBS).

"Moorooka Dental is excited to provide dental implants in Brisbane and continue to serve patients with high-quality dental care. The team is dedicated to ensuring that patients receive the best dental care possible, and the team look forward to continuing to serve the community," concluded by Dr Kadwa.
