

Roofing Company in Columbia MD Helps Lower Costs with EPDM Roofing for Homes

March 07, 2023

COLUMBIA, MD - March 07, 2023 - PRESSADVANTAGE -

Ridgeline Roofers Columbia, a roofing company in Columbia, MD, wants to point out that they can provide ethylene propylene diene terpolymer (EPDM) roofing that can decrease energy costs for homes. A flat roof is often found in many modern homes and EPDM roofing may be the suitable solution for a residential roofing project. Not only will this kind of roofing with an extremely strong rubber membrane minimize energy costs but it has also been designed to withstand heavy rains, strong winds, high heat, and hailstorms.

Ernest Krebs, founder of Ridgeline Roofers, says, "EPDM is a highly durable synthetic rubber roofing membrane that is commonly used on flat and low-slope roofs. Ethylene and propylene are produced from oil and natural gas, which are the two primary materials. The roofing membrane is very durable and its performance is not hampered by extreme weather conditions."

EPDM roofing provides the advantage of high durability because it is made from highly durable synthetic rubber roofing membrane that is usually utilized in flat and low-slope roofs. It has strong durability because it

can withstand extreme weather conditions. EPDM roofs also offer the advantage of being available in a range of colors, including black, white, and brown. Two kinds of reinforcements are also available for EPDM roofs, which are the non-woven fabric and continuous filament.

EPDM can either be used as a single-ply roofing to offer a 100 percent waterproof and weatherproof roof. It can also be used on top of another roofing system like shingles, metal or tiles to provide an added layer of protection.

A disadvantage of EPDM roofs is the possibility of getting damaged by hail, UV rays, debris, or other elements. EPDM roofs can develop bubbles or blisters that result into "patches" in the roofing membrane. Ridgeline Roofers can provide the EPDM roof repair to resolve such issues.

EPDM roofing is often recommended for homes because of its extreme durability. An EPDM roof can be expected to stand strong during the high temperatures of summer and the cold temperatures of winter. In addition, an EPDM roof can last for approximately 30 years before it has to be replaced, which makes them great investments for any homeowner.

Unfortunately, because of its unique characteristics, EPDM roofing is most suitable for roofs with only a low slope. Thus, a home with a steeply pitched roof will usually not be suitable for EPDM unless it is redesigned to have flat roof.

Ridgeline Roofers Columbia always customizes each roofing project for every client in Columbia and the surrounding areas. They have more than 30 years of combined experience and they are confident they will be able to offer the best roofing service. They offer a range of roofing systems such as asphalt shingles, metal, cedar shake, and flat roofing with EPDM & TPO materials.

Ernest Krebs says, "Due to Maryland's harsh winters, the roof of your home is your first line of defense to protect your investments. We are here to help ensure that your roof will protect your belongings and loved ones for years to come. We offer roof repairs in Columbia that will keep you protected from the elements, not to mention looking great."

Ridgeline Roofers Columbia has been getting highly positive reviews on Google and they currently have an overall rating of 5.0 out of 5 stars. In a recent review, Ora G. gave them five stars and said, "Our roofer, Ridgeline Roofers Columbia, replaced our roof and gutters a few weeks ago. The insurance claim procedure was hassle-free for us because of the staff's assistance. Ernest provided an estimate for the job, and then kept us updated on progress every step of the way. This company provides excellent customer service and quality roofing services around Columbia MD. They gave us options to choose from so we could find the best fit for our budget."

Those who are interested in learning more about the roofing services provided by Ridgeline Roofers Columbia, such as roof repair, roof inspections, and roof maintenance, can check out their website or contact them through the telephone or via email.
