

# Bamboo Boxer Briefs Added To The Little Bamboo Collection

*December 03, 2015*

December 03, 2015 -
The Little Bamboo, a top retailer on the the mega shopping portal Amazon.com, has announced that they have a new addition to their extensive collection of bamboo products. The men's boxer briefs are already proving to be very popular. They are added to the collection of place mats, socks, t-shirts and soap already stocked by the company.

"Bamboo is an amazing material that can quite literally be used for anything," says Sharon Allen from The Little Bamboo. "Very few people know it can be used as a fabric, which is a shame because it is wonderfully soft and highly breathable. We are so happy to be able to offer an increasing number of bamboo garments to our customers like our mens bamboo boxer briefs."

Bamboo is one of the planet's most sustainable and eco-friendly materials. Added to that, bamboo is one of the best plants in terms of cleaning the air. As such, the increase in bamboo forests is making a significant difference to levels of pollution as well. Those who purchase bamboo products, including the mens bamboo briefs, are supporting the planet as a whole.

The bamboo briefs have already received numerous positive reviews. "My husband thought these bamboo boxer briefs were extremely comfortable to wear," says one happy customer. "The bamboo material is thin and silky which makes the briefs breathable. Since they are breathable it helps keep him from sweating. They do fit snugly which keeps them from bunching up. These bamboo boxer briefs will come in handy in the summer time when he sweats a lot more. The briefs are machine washable in cold water on gentle cycle. I let them air dry since they dry fairly quick. He would recommend these bamboo briefs to anyone that likes comfortable, breathable, and odor eliminating (from sweat) boxers."

Those who are interested in learning more about the men's boxer briefs and the other bamboo products are encouraged to visit The Little Bamboo's Amazon storefront for further information on their various products and their benefits.
