Tree Service Pros Altamonte Springs Launches New Recycling Program to Repurpose Wood Waste from Tree Removals

March 01, 2023

March 01, 2023 -
Altamonte Springs, FL ? Tree Service Pros Altamonte Springs is proud to announce the launch of their new recycling program. The program aims to reduce waste and repurpose wood debris from tree removals for construction projects and furniture-making.

This initiative is part of their commitment to environmental responsibility and sustainability. It serves as a way to bridge the gap between the tree service industry and local construction projects.

The program aims to reduce waste by repurposing wood debris from tree removals that can be used in various construction projects and furniture-making. With this new program, Tree Service Pros Altamonte Springs hopes to encourage more sustainable practices among their customers and industry peers.

Through this recycling program, Tree Service Pros Altamonte Springs will collect leftover wood that would have otherwise gone to waste. The wood is then milled into usable pieces at their facility and sorted according to size, shape, species, etc.

The sorted pieces are then sold at a discounted rate back to individuals or businesses who may need them for various uses, including flooring, furniture-making, and other craftsmanship projects. By using these repurposed wood pieces rather than buying new lumber or purchasing non-sustainable materials like plastic or metal, consumers can help reduce the amount of wood waste sent to landfills every year while saving money.

Tree Service Pros Altamonte Springs has long been a leader in the tree removal industry. They offer a full range of services, including tree removal, trimming, stump grinding, and more. To further decrease the amount of waste produced by these activities, the company has now developed a recycling program to repurpose wood debris from tree removals.

?At Tree Service Pros Altamonte Springs, we are committed to reducing our environmental footprint and taking responsibility for the sustainability of our planet,? said Ayuwl Vauqg, CEO of Tree Service Pros Altamonte Springs. ?This new initiative will ensure that the wood waste from our tree removal activities doesn?t end up in landfills but is reused and repurposed for use in construction projects and furniture-making.?

The recycling program will be available to all Tree Service Pros Altamonte Springs customers. The wood debris from tree removals will be collected and transported to local businesses and organizations that can use the wood for their projects.

Customers can also request that the company deliver the wood directly to their homes or businesses. It can be used as firewood or incorporated into construction projects, such as decks, fences, and other outdoor structures.

In addition to this new recycling program, Tree Service Pros Altamonte Springs has implemented several other initiatives to reduce their environmental impact. These include using eco-friendly equipment and biodegradable chemicals for pest control, composting all organic materials, and offering free consultations with certified arborists to help customers maintain healthy trees on their property.

?We understand that our actions impact the environment, and we take that responsibility seriously,? said Vauqg. ?That?s why we are committed to providing our customers with the highest quality service while striving to minimize our environmental impact. Our new recycling program is the latest example of our commitment to sustainability.?

Tree Service Pros Altamonte Springs is proud to offer this innovative new recycling program as part of its commitment to eco-friendly practices.
