San Francisco, CA: In a time when most people are searching for the best way to maintain their health, an increasing number of them are turning to chiropractic care. In San Francisco, The Balanced Atlas provides the highest quality NUCCA chiropractic care to help individuals achieve optimal wellness by applying gentle, non-invasive techniques.

According to the Gallup-Palmer College of Chiropractic Annual Study, a whopping 78% of Americans prefer to test alternative means for addressing their physical pain before they take a doctor-prescribed medication. A NUCCA Chiropractor can address multiple causes of pain, headaches, and migraines, such as misalignment of the neck and spine. One of the most experienced NUCCA Chiropractors in San Francisco is Dr. Harrison, Founder of The Balanced Atlas.

Valuing the trust of his patients, Dr. Harrison has created a warm environment at The Balanced Atlas to ensure that every patient feels comfortable and relaxed while receiving their NUCCA chiropractic care. Dr. Harrison is a Chiropractor that provides thorough evaluation and diagnosis to ensure that each patient gets the best treatment that addresses their body pain and other conditions directly. Checking of postural

alignment, x-rays, and a NUCCA analysis are all provided to determine a patient's NUCCA chiropractic needs. Dr. Harrison then creates a personalized treatment plan for each patient.

Dr. Harrison is an excellent Chiropractor. The pain in my back and shoulder and vertigo, which are the result of a car accident, have lessened because of Dr. Harrison's good care and treatments. Thanks to his care and dedication, life is without stress and almost pain-free," writes a satisfied patient on Google reviews.

Although NUCCA chiropractic care is a gentle, non-invasive practice, it can have powerful effects on the whole body. With the innovative treatments at The Balanced Atlas, patients can restore spine and neck alignment, allowing the body to heal naturally. In turn, this relieves pain and tension that builds up in the body, allowing the individual to regain a better quality of life.
