

Electrodry Offers Affordable Solutions For Keeping Air Conditioners Clean in Adelaide

March 06, 2023

March 06, 2023 - PRESSADVANTAGE -

Electrodry Aircon Cleaning Adelaide is proud to offer affordable solutions for keeping air conditioners clean. With over 35 years of experience providing home services across Australia, Electrodry is dedicated to improving customers' units' cooling performance and reducing their energy costs.

According to Electrodry's Marketing Manager, Grant Burchell, "Air conditioner cleaning is an essential service that is often overlooked. By not replacing the air conditioner filter regularly or having no regular air con cleaning, the unit has to work a lot harder to push out fresh and clean, cool air. Professional air conditioner cleaners will clean the entire air conditioner system from top to bottom, removing all the dirt, dust and mould that has built up over time."

Good ventilation keeps homes healthy, and air conditioner filters covered with dust decrease the amount of air being circulated. When air filters are dust-clad, they become a source for allergens and contamination, since all the sludge of the filter is then being distributed into the air inside the room. Air conditioning cleaning ensures that the air breathed in is high-quality and also improves the efficiency of the air conditioning, cuts down electricity costs, and improves air quality.

Electrodry's expert team is equipped with high-quality products and proven solutions to clean all types of air conditioning systems, including Ducted Units, Split System Units, and Multi-Split System Units. The cost of cleaning air conditioning depends on the specific unit and whether it is a residential or commercial system. At Electrodry Aircon Cleaning, they strive to provide the best air conditioning cleaning in Adelaide at an affordable price.

"The goal is to help keep air conditioning systems clean and functioning effectively, which dramatically increases cooling and air flow," says Grant Burchell. "The cleanliness of residential air conditioners should be prioritized because people sleep with these units and wouldn't want any health-associated problems. While one may want to perform the cleaning themselves, it is not recommended. Highly trained technicians are better positioned to clean residential air conditioners' filters, coils, etc., as they perform technical cleaning and maintenance. Additionally, commercial air conditioning systems are just as important as they are exposed to customers. Government Health and Safety checks may also include clean air conditioning systems."

Electrodry - Aircon Cleaning Adelaide has quality technicians on the ground to thoroughly clean both commercial and residential air conditioning systems in Adelaide. By choosing Electrodry, customers can enjoy improved air quality, lower energy costs, and extended equipment lifespan.
