

Electrodry Introduces Safe and Effective Air Conditioner Cleaning Service for Brisbane Homeowners

March 07, 2023

March 07, 2023 - PRESSADVANTAGE -

Electrodry Aircon Cleaning Brisbane has announced the launch of its safe and effective air conditioner cleaning service for Brisbane homeowners. With over 35 years of experience providing home services across the region, ElectroDry is proud to offer this new service to help homeowners improve their unit's cooling performance and reduce energy costs.

According to Grant Burchell, Marketing Manager at ElectroDry, "Air Conditioner Cleaning is important in maintaining home's comfort and efficiency. The team of professional air conditioner cleaners will clean the entire air conditioner system from top to bottom, removing all the dirt, dust and mould that has built up over time. With no regular air con cleaning or by not replacing the air conditioner filter regularly, ac unit has to work a lot harder to push out fresh and clean, cool air. This not only affects the efficiency of AC unit but can also impact the air quality in the home, leading to health problems."

In addition to improving air quality and unit efficiency, air conditioning cleaning also cuts down on electricity costs. By having a clean and well-maintained unit, homeowners can avoid overworking their air conditioning

system, which can lead to increased energy consumption and higher bills.

Looking to the future, Burchell added, "At Electrodry Aircon Cleaning, the team is committed to providing top-quality services to customers in Brisbane. As Electrodry continues to expand its services and offer innovative solutions, the team look forward to helping even more homeowners improve their indoor air quality and reduce energy costs."

Aircon Cleaning Brisbane offers cleaning services for various types of air conditioners, including ducted units, split system units, and multi-split system units. Their qualified technicians handle duct heating cleaning from the central location and across the ductwork. They also clean the ac air vent and ensure that the system works properly with only clean, cool air coming in. With their years of expertise, they can clean every nook and cranny of multi-split system units.

"The highly trained technicians are better positioned to clean residential air conditioners' filters, coils, etc., as they perform technical cleaning and maintenance. The team also understand that each brand manufactures its air conditioners uniquely, and Electrodry has taken the time to study and understand all the intricacies of the following air conditioning brands: Carrier, York, Mitsubishi Electric, Daikin, Toshiba, Sharp, Panasonic, LG, Daikin, Fujitsu," said by Burchell.

Aircon Cleaning Brisbane is located at 2 Brook St, South Brisbane QLD 4101, Australia, and can be reached at 1300 902 585 or via email at info@aircon-cleaning.com.au
