

Contractor Specializing in Ahwatukee Shower Remodeling Discusses the Benefits of This Type of Home Renovation

March 16, 2023

March 16, 2023 -
Phoenix Home Remodeling is an award-winning Chandler, AZ-based contractor. The company has been recognized many times over for the visions it brings to life when it comes to improving spaces in Phoenix homes. This includes the company?s highly sought-after kitchen and bathroom remodeling services.

Phoenix Home Remodeling can even take these types of remodels one step further by improving only a portion of these high-use rooms. A good example of which is Phoenix Home Remodeling?s shower renovation services. A task that can dramatically improve the look, feel, and comfort level of any bathroom setting.

Jeremy Maher, the Co-Owner of Phoenix Home Remodeling, says, ?When we meet with clients to discuss shower renovations, many homeowners are surprised at all the benefits that remodeling these areas of a bathroom have to offer. That?s why we wanted to take the time to further discuss this type of bathroom

remodeling. The possibilities are endless, and we are always happy to discuss shower remodeling with any of our customers that are thinking about getting it done.?

The company co-owner went on to say that most often shower remodeling involves dealing with worn and out-of-date bathrooms in older homes. This is very common because over time shower features no longer keep up with the times and fixtures and plumbing start to wear out and need constant repairs. He stated that older showers also did not make good use of the existing space in a bathroom; something that modern shower designs and premade stalls nicely do.

They are also often called upon to take Ahwatukee shower remodeling steps that will add modern features to bathrooms. This can include features that do such things as automating shower functions or controlling light levels. Improved shower faucets & spray heads are also available to go along with added shower seating and shelving. This type of Phoenix Home Remodeling task also may add tiles and other decorative features or do such things as add a space-saving walk-in shower.

Shower renovations may also become essential if a family moves into a new home and a member of that family is handicapped. Normal bathrooms can be very difficult for a handicapped person to function in. It was also pointed out by Maher that renovating a shower can significantly enhance the looks of a bathroom and will also increase a home?s value.

The importance of these things should never be overlooked when a homeowner is deciding whether to renovate a shower or not. He also talked about customers having the choice to only remodel the shower areas in a bathroom or doing this task as part of an overall bathroom renovation. He says that they will work with a customer to come up with a shower remodeling plan that fits their style, needs, and budget.

Those that have had their showers, bathrooms, kitchens, or other rooms renovated by Phoenix Home Remodeling often leave reviews with high praise for the company?s services. Natalie Taylor proclaimed, ?Beautiful, beautiful, beautiful! From the first phone appointment to the last final walk-through, Phoenix Home Remodeling was excellent A definite A+. Our shower turned out so beautiful, we may not use it and just call it art! The entire staff at PHR is professional, talented, and communicative. They offer true craftsmanship on every level. I will always refer Phoenix Home Remodeling and will also use them in any of my future projects. Thanks so much, Jeremy, Mark, Lupe, Chris, Ben, Aaron, and the design team!?

Mary Liu stated, ?We recently used Phoenix Home Remodeling to remodel our small 90's kitchen and I cannot say enough positive things about our experience working with them. From the initial design phase to the project plan execution, the whole process was straightforward, well-organized, and efficient. The crew was very professional, good with timelines, and detail-oriented. They also brought in excellent subcontractors. The result is beautiful! We highly recommend them and will use PHR again for future

projects.?
