

New Dividend Stock Investing Course Quickly Becomes One Of The Highest Rated Courses For Investing In High Yield Dividend Stocks On Udemy

December 07, 2015

December 07, 2015 - PRESSADVANTAGE -

Daniel Hall Combined Enterprises is proud to announce that their new dividend stock investing course authored by finance professor and highly successful investor Scott Borwn Ph.D. is quickly becoming one of the highest rated courses for investing in high yield dividend stocks. The course is available through Udemy for easy access. Profitable dividend stock investing is one of the most recommended forms of investing today.

Luanna Rodham, spokesperson for Daniel Hall Combined Enterprises, says: "We are so grateful to see that our students are happy with the results of our course. It really has the potential to be life-changing, giving people the tools and skills they need in order to earn an income through investing."

The course has been very positively received by its many students. They have been using the highest dividend paying stocks course coupon code in order to access the study through Udemy. Udemy, meanwhile, is a very respected course provider website that also offers a community for all its students. As such, while the study is self-directed, students feel that they are still part of a group of like-minded individuals.

"Earning the right to use the CFA designation has put me in contact with plenty of courses," says Franco C. "Dr. Brown teaches straight-forward finance in an easy to follow, entertaining way. But that is just the beginning: His discussion of technical analysis (a subject that is voodoo to many in academia) makes his course one in touch with the reality of every day Wall Street. My respects to Dr. Brown in putting together such a fine piece of work."

With the course's increasing popularity, it is now officially one of the highest rated dividend stock course on Udemy. It offers nine hours of video to discuss the 153 lectures included in the course itself. The course is also updated on a daily basis and is suitable for beginners and more experienced investors alike. The course also includes a number of quizzes, included at the end of each section. This enables students to check their

own skills and determine whether they have picked up the vital elements of the course.

"Very comprehensive discussion on utilizing and maximizing a dividend portfolio," says Frank M.
