

Dr. Mark Hickman Offers Two All Inclusive Cost Options for Procedure to Reverse a Vasectomy

March 17, 2023

New Braunfels, TX - March 17, 2023 - PRESSADVANTAGE -

Dr. Mark Hickman, MD, FACS, a microsurgery expert in New Braunfels, TX, is offering two all-inclusive options for affordable vasectomy reversal for residents of New Braunfels and those who live in other places in Texas and in other states. One option is priced at \$3,300, which includes an oral sedative and local anesthesia. The other option is priced at \$4,200, where the procedure is performed under IV sedation that is handled by a board-certified anesthesiologist.

Dr. Hickman says, "With this all inclusive fee there are no surprises. Call today for your free consultation. Also, if you happen to be traveling to see us, please ask Pat our office manager about our discounted hotel rates here in beautiful New Braunfels, Texas."

Dr. Hickman has also made arrangements with local hotels in New Braunfels to allow out of town patients to get a 50 percent reduction in the price of their hotel accommodations. He wants to point out that out of town patients can hit two birds with one stone by going to New Braunfels for the procedure and also enjoy the

sights and activities in the tourist town. It is frequented by tourists because of a huge number of attractions, including two of the most beautiful rivers, which are the Guadalupe River and the Comal River. Visitors can enjoy a lot of fishing, rafting, tubing, and swimming.

Also found in New Braunfels is Schlitterbahn, which happens to be the biggest water park in the US. This is considered to be the world's best water park with a wide variety of pools, river rides, waterslides, and various adventures from mild to wild. It has four separate sections, which each section with a children's area, not-so lazy river, a swim-up bar, and unique signature attractions.

Also close to the New Braunfels vasectomy reversal center is the quaint village of Gruene. This little village has various kinds of restaurants and more than 20 shops where visitors and enjoy a lot of browsing. Gruene Hall also provides a lot of good music and a country dance atmosphere. In addition, there is the Natural Bridge Caverns, which is only 10 miles away from New Braunfels. This is a family owned and operated natural attraction. State-of-the-art lighting provides provides dramatic illumination for the massive formations inside the living cavern.

Dr. Mark Hickman underwent residency training in general surgery for five years at the University of Texas Health Science Center at San Antonio. It was at this point in time that he was introduced to the microsurgery methods employed by plastic and reconstructive surgeons. Realizing how the minimally invasive procedure can provide for a much improved experience and results for his patients, he decided to focus on using microsurgery techniques, which he has chosen to use for his practice.

The procedure to reverse a vasectomy involves the microsurgical repair of the vas deferens with the help of a Zeiss OPMI-MDM operating microscope and 10 to 15 stitches using a 10-0 nylon suture to join the two ends of the vas with a watertight closure. To optimize the chances of success, Dr. Hickman will take a sample fluid from the testicular end of the vas and examine it under a laboratory microscope. There are three possible situations encountered when checking the sample fluid. The first and the best situation is that the sample fluid contains whole sperm. The second possible situation is that the fluid is thin and contains no whole sperm but sperm parts.

The third potential situation is the sample fluid is thick and pasty and contains no sperm. This means there is an obstruction, which is known as an epididymal blowout. In this situation, Dr. Hickman will also perform a vasoepididymostomy in addition to the vasovasostomy. It should be noted, however, that there will be no additional cost even if both repairs will need to be done.

Those who are interested in getting more information about the vasectomy reversal being offered at an

affordable all-inclusive prices can visit the Microsurgical Vasectomy Reversals by Dr. Mark Hickman website or contact them through the telephone or by email. They are open from 8:30 am to 5:00 pm, from Monday to Friday.
