

# South Beach Skinlab Introduces South Beach Skincare Repair & Release Cream

*March 27, 2023*

Las Vegas, Nevada - March 27, 2023 - PRESSADVANTAGE -

South Beach Skinlab, based in Miami, FL, has introduced the South Beach Skinlab Skin Care Cream that utilizes naturally occurring neuropeptides to counteract the way people age. South Beach Skinlab, under the direction of Skincare Doctor & Cosmetic Specialist Dr. Ray Shelton, has recently released their new South Beach Skin Lab: Repair & Release Cream. This is an anti-aging skin care formula that is supported by a money-back guarantee. This revolutionary skin care compound has been observed to get rid of wrinkles within 12 weeks or less.

The South Beach Skincare Anti Aging Wrinkle Cream makes use of skin care methodologies with the South Beach trademark to provide visible results in 12 weeks with regular use. This is a brand new FDA approved clinical grade skin care product ensured to be safe for all skin types. It has been found to be 100 times more potent than conventional skin care products and provides a painless solution for getting rid of hyperpigmentation, signs of aging, and more.

This new product employs a revolutionary formula inspired by a small group of first class dermatologists and researchers, such as Chris Li and Kim Kyuhyuyung from the Department of Biology of the City College of New York and the Department of Biology of Brandeis University, Waltham, MA, respectively. They noted that the processing of neuropeptide precursors has the potential for pushing up sagging skin. Before and after photographs provide evidence that South Beach Skincare can provide anti-aging results in 12 weeks or less.

One important active ingredient is squalane, which enhances the vibrancy and luminosity of the skin. Another key ingredient is shea butter, which has antioxidant and anti aging characteristics. It also contains matrixyl synthe 6, which has been found to promote the production of collagen and elastin by the skin. The South Beach Skincare treatment is effective for dry, oily, sensitive, and mixed skin types.

It is important to note that the South Beach Skincare treatment should not be confused with the Lifecell South

Beach Skincare's All-in-One anti-aging treatment. South Beach Skincare takes a very different approach to combating the effects of aging on the skin.

A spokesperson for South Beach Skinlab says, "Aging can cause many unwanted changes to your skin including dry skin, blotchy skin, dull skin tone, and age spots. Fortunately, this all-in-one anti-aging skincare formula is a fragrance-free moisturizer with brightening properties that address signs of aging with revolutionary hydrating properties that work as a combination of moisturizer, antioxidant, and anti-inflammatory to help maintain your youthful glow."

Before the development of the South Beach Skinlab Skin Care treatment, dedicated eye creams, anti wrinkle creams were the best way to ensure that the skin appears young and fresh. When shopping for wrinkle creams, ingredients such as vitamin C, which may help in minimizing the appearance of wrinkles by counteracting the effects of free radicals that can cause damage to the skin, was regarded as the gold standard.

However, leading dermatologists and the American Academy of Dermatology are finally beginning to realize the potential of products like the new South Beach Skinlab skin care treatment for its anti-inflammatory and antioxidant characteristics. While dermatology clinics in San Diego, Miami, New York, and Los Angeles are beginning to carry the South Beach Skinlab Repair & Release Cream, this face cream with anti-aging properties is not available in stores and can only be bought online.

According to leading celebrity dermatologist Dr. Ray Shelton, when South Beach Skinlab skin care treatment is used as instructed, its anti-aging capabilities can leave the skin appearing visibly smoother, brighter, and younger. It is suitable for people who want to reduce their fine lines, wrinkles, and other signs of aging. The combination of coffee seed extract, retinol, peptides, and antioxidants can reduce blemishes, including signs of sun damage to the skin.

Those who are interested in getting more information about the skin care products of South Beach Skinlab can check out their website or contact them on the phone. South Beach Skincare is featured not only on Amazon but also on Etsy.
