One recent 5-star review of its repair services says, "Highly recommend this place! Both staff members we met were really nice and professional and easy to work with. More importantly, they were great at what they do and went above and beyond. We went in to get my fiancé's opal ring resized and polished. We thought we would have to leave it for a few days and pick it up later as most places take at least a few days if not a couple of weeks, but this place did the job in an hour and a half and did it well! They also shined the ring and ordered special opal polish for us and gave us recommendations for gemologists for future cleanings as opals are very fragile. All in all, great place!"
