La Jolla Tree Service Experts Utilize Cutting-Edge LiDAR Technology for Comprehensive Tree Risk Assessments

March 21, 2023

March 21, 2023 -
La Jolla, CA - La Jolla Tree Service Experts, a leading tree care company in La Jolla, California, is pleased to announce the launch of their new cutting-edge LiDAR technology for comprehensive tree risk assessments. This state-of-the-art technology utilizes lasers to measure trees' precise location and height to assess the risk of falling branches or trees accurately.

"At La Jolla Tree Service Experts, we are always looking for ways to improve our services and provide our customers with the best possible experience," said Radford Cliffort, CEO of La Jolla Tree Service Experts. "We are excited to be the first tree care company in this region to utilize LiDAR technology for tree risk assessments, as it provides us with a more detailed and accurate picture of potential danger."

LiDAR, which stands for Light Detection and Ranging, is a remote sensing method used to measure distances by illuminating an object with laser light and measuring the reflection. The data collected can then be used to create a three-dimensional landscape model, allowing arborists to identify potential risks such as dead or damaged limbs, weak branches, and leaning trees. With this technology, La Jolla Tree Service Experts can now offer their clients comprehensive, accurate, and reliable tree risk assessments.

"Our team of ISA Certified Arborists has been trained in using this advanced technology to provide our clients with the most accurate assessment of their trees' condition," said Cliffort. "By utilizing LiDAR technology, we can help ensure that trees remain standing and that our clients' properties remain safe from potential damage caused by falling branches or trees. We are proud to be pioneers in this field and look forward to continuing

to provide our clients with the highest level of service."

La Jolla Tree Service Experts is committed to providing their clients with professional tree care services and excellent customer service. Using LiDAR technology, they can offer clients a more detailed assessment of their trees' condition and greater peace of mind.

"Tree risk assessment is an important part of any property maintenance plan, and LiDAR technology is revolutionizing how it is done," said Cliffort. "We are proud to be at the forefront of this new technology and continue to provide our clients with top-notch tree care services."

La Jolla Tree Service Experts is a full-service tree care company based in La Jolla, California. They specialize in professional tree pruning, planting, fertilization, and removal services for residential and commercial properties.
