

Louisville Tree Service Experts Introduces MycoTreeCare Program to Revolutionize Tree Health Across the Country

March 21, 2023

March 21, 2023 -
Louisville, KY - Louisville Tree Service Experts is proud to announce the launch of its groundbreaking MycoTreeCare program, a revolutionary approach to tree health and vitality using innovative methods of mycorrhizal fungi treatment. This program is the first of its kind in the United States and has been developed by Louisville Tree Service Experts' team of experienced arborists and technicians.

"At Louisville Tree Service Experts, we are committed to providing our customers with the highest quality tree care services available," said Emil Vizcanio, CEO of Louisville Tree Service Experts. "Our MycoTreeCare program provides a new way of treating trees that is more natural and sustainable than traditional methods. We are confident this program will revolutionize tree health for homeowners, commercial properties, and municipal parks nationwide."

MycoTreeCare utilizes mycorrhizal fungi, which is beneficial to plant health and helps to improve soil

structure and nutrient uptake. Mycorrhizal fungi form a symbiotic relationship with plants, helping to increase water and nutrient absorption while protecting plants from environmental stresses. It also helps reduce the fertilizer needed to sustain healthy trees.

The MycoTreeCare program enlists the expertise of trained technicians who specialize in the proper application of mycorrhizal fungi, ensuring maximum effectiveness and safety. Louisville Tree Service Experts technicians use sophisticated equipment to inject the fungi directly into the root system of the tree where it can begin to work immediately.

"Our MycoTreeCare program is designed to be safe, effective, and affordable," said Vizcanio. "We are passionate about delivering top-notch tree care services that deliver results for our customers. With MycoTreeCare, our customers can feel confident knowing their trees are receiving the best possible treatment?in the most natural way possible."

In addition to introducing its new MycoTreeCare program, Louisville Tree Service Experts offers various other tree care services, including fertilization, pruning and trimming, disease management, stump grinding and removal, cabling and bracing, insect control, and more. In addition, the company's team of certified arborists is available to consult and provide recommendations tailored to each customer's needs.

Louisville Tree Service Experts is a leading provider of comprehensive tree care services in Louisville, KY. Founded in 1998 by certified arborist Emil Vizcanio, the company has extensive experience in tree maintenance and health.
